TELEMATICS**

Eliminate the guesswork and boost efficiency and fleet safety

Option 01 Remote Tacho Downloads

Add Vehicle Tracking For £5 Extra Per Month

Get instant access to essential tachograph analysis and transform how you manage tacho compliance, driver hours, and WTD rules. Collect all tacho data daily and remotely, making it easy to track your driver's availability, work, drive, and rest periods in real time.

Option 02 Vehicle Tracking

Add Remote Tacho Downloads For £5 Extra Per Month

DOT Tracking offers real-time vehicle tracking, allowing you to monitor your fleet via an intuitive web-based interface and detailed road maps. Locate your vehicle's current position, track its route history, and compare routes for efficiency. You can also locate vehicles closest to a specific area and set filters to watch particular vehicles and drivers.

Option 03 Advanced Telematics

Includes Vehicle Tracking & Remote Tacho Downloads

DOT Tracking Advanced Telematics offers real-time visibility of your fleet, including acceleration, braking, idle time, fuel, mpg, mileage, engine load, and cruise control. Analyse critical driver behaviour, identify issues quickly and provide driver feedback through the driver debriefing system. Furthermore, access live tacho analysis, compliance, driver hours, and WTD rules.

01

Option 01 Remote Tacho Downloads

Streamline your tacho downloads
to save time and reduce stress

A remote tachograph download device

DOT TACHO
DOWNLOADS

Receive instant access to essential tachograph analysis, which will instantly transform how you work and manage tachograph compliance, regulations, driver hours, and WTD rules.

The DOT device delivers immediate benefits, including real-time visibility of your tachograph data and a live summary of your driver's hours and breaks on the Tachomaster dashboard. Increase driver safety and minimise infringements with automatic alerts for upcoming driver breaks (15-minute warning) and any missed or insufficient breaks. You can optimise and plan routes more effectively with a precise overview of your driver's hours.

Join thousands of other companies and streamline the stressful and time-consuming job of manually chasing and collecting driver card and vehicle unit tachograph data. The DOT device will increase fleet visibility, help uncover potential issues immediately, reduce potential risks, and improve fleet safety and compliance.

Per Month

Automatically collect all your driver card and vehicle unit tachograph data daily and remotely through our new DOT device. Transform how you collect live tachograph data remotely and immediately track your driver's availability, work, drive, and rest periods.

Streamline the way you manage your tachograph compliance

The DOT device automatically collects all your essential driver and vehicle data instantly. Transform how you collect tacho data and end the stressful and time-consuming task of manually chasing and collecting driver and vehicle data.

Receive alerts for vehicles moving without a driver's card. Receive instant alerts if a driver drives a vehicle without a driver card inserted and reduce the stress of reconciling missing mileage.

Monitor live driving hours and receive alerts for driver breaks

Track your driver's start of duty, live drive periods, and availability left, and receive alerts for upcoming driver breaks (15-minute warning). Missed breaks and insufficient breaks have ended prematurely. Increase your fleet's safety, prevent most infringements, and reduce time-consuming compliance issues and possible fines.

Increase fleet visibility and enhance driver safety

See what's happening on the road and instantly access tachograph driver and vehicle data. The DOT device will increase fleet visibility and help uncover potential issues immediately. Improve fleet safety, reduce compliance issues, prevent unnecessary driver infringements and avoid expensive fines.

Improve driver and vehicle utilisation as well as planning

With live notifications of your driver's hours, including rest periods and driving availability, you can optimise and plan routes according to your available resources, thereby avoiding vehicle and driver downtime.

View geofence hits and driver breaks on a map

Add the DOT vehicle tracking option to gain an accurate overview of your fleet's activities. View live geofence hits for any vehicle entering or leaving a specific area and the exact position on a map of your driver's breaks.

Drivers can view their real-time hours via the Tachomaster worker app

The Tachomaster Worker App will help transform how your drivers can track and manage their working week and help prevent unnecessary infringements, keeping them safe and compliant.

The Worker App includes Working Pattern and Shift View Calendars to help your drivers keep track of their working status, rest periods and tachograph compliance regulations. The app provides the driver with a constant visual overview of the recent days, weeks or months of work, including any leave or sick days and highlights any driver infringements. Drivers can see their driving hours or WTD infringements they have incurred.

02

Option 02 Vehicle Tracking

Real-time vehicle tracking made
simple with DOT Tracking

Boost efficiency and safety with intelligent vehicle tracking

**DOT VEHICLE
TRACKING**

DOT Tracking provides a real-time vehicle tracking solution to help you monitor your vehicles via the intuitive web-based software interface, detailed road maps and a satellite view.

Receive real-time alerts for fleet activities and events, including geofence entry and exits, speeding, harsh braking, engine idling and waiting times within a geofence.

Instantly locate your vehicle's current position and effortlessly follow the vehicle route trail history. Track vehicle speeds along a history trail, view the driver's start and finish times, and the exact locations of a driver's tacho breaks.

Make planning easier by comparing routes to find faster, shorter or more efficient options. Instantly locate vehicles closest to or within a specific area for those emergency jobs. Observe certain vehicles and drivers and create a customised list of vehicles you wish to track.

DOT Vehicle
Tracking

Per Month

Make the most of your fleet with smart vehicle tracking

DOT VEHICLE TRACKING

Real-time Vehicle Tracking

Gain real-time vehicle tracking over your entire fleet. The current positions of your vehicles are overlaid on detailed road maps and satellite imagery.

DOT Vehicle Manager App*

The powerful app increase fleet visibility and monitors the real-time activity of all your vehicles, drivers, deliveries and compliance via your smartphone.

Vehicle History Trails

Gain a detailed picture of a vehicle over a specific period, view start, break and finish times, routes taken, geofences hits and a speed graph from the trail.

Detailed Satellite Maps

View all vehicle positions on a high-res map with satellite imagery. Customise the display to show detailed data such as reg, fleet number and description.

Track Specific Vehicles

Set filters to track specific drivers or vehicles to see what is happening, such as driving, in a geofence, idling, engine off, on, and current waiting times.

Calculated Routes

Generate routes on an interactive map and calculate journeys from one place to another, including multiple locations, with an option to optimise the routes.

Unlimited Geofences

Create geofences and set attributes to highlight particular events, such as speeding, waiting time alerts and vehicles entering or leaving a geofence.

Speed History Data

Gain a clear view of your vehicle speed via the speed graph linked to a vehicle history trail. See speed spikes or long stops at any time of the journey.

Vehicle Search Locator

Make dispatching quicker by locating the nearest vehicle and driver within a specific location, reducing costs and saving time, mileage, and fuel.

Suite of Reports

Gain valuable insight with immediate access to crucial information and performance metrics to uncover trends and provide reliable forecasts.

Scheduled Reports

Improve communication, keep everyone informed with scheduled reports for relevant reports, and regularly send links to your whole team.

Road Tech Notifier Alerts**

Create different alerts to track certain fleet activities, including speeding, harsh braking, idling and waiting times within a geofence.

Remote Tacho Downloads & Vehicle Tracking

Effortlessly manage tachograph downloads and
vehicle tracking with our all-in-one DOT Device

**DOT
TRACKING**

Combine remote tachograph downloads with vehicle tracking

DOT TACHO
DOWNLOADS

+

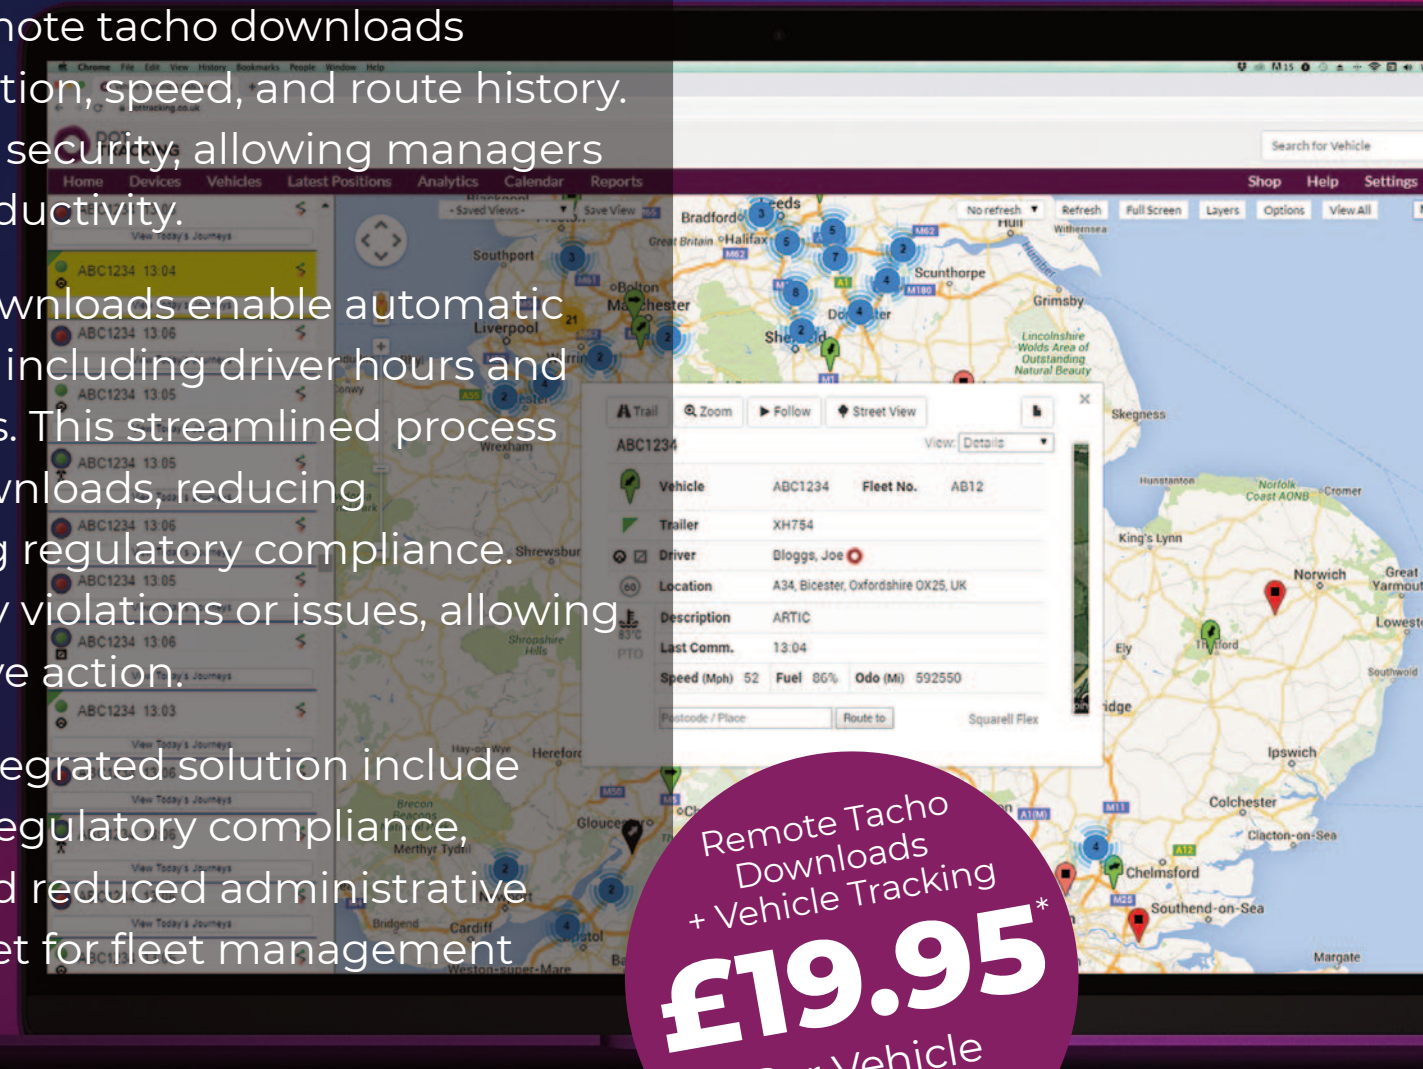

DOT VEHICLE
TRACKING

Vehicle tracking combined with remote tacho downloads provides real-time visibility into location, speed, and route history. This enhances fleet monitoring and security, allowing managers to optimise routes and improve productivity.

Additionally, remote tachograph downloads enable automatic retrieval of crucial tachograph data, including driver hours and compliance with driving regulations. This streamlined process eliminates the need for manual downloads, reducing administrative burden and ensuring regulatory compliance. Managers can promptly identify any violations or issues, allowing for timely intervention and corrective action.

Overall, the main benefits of this integrated solution include enhanced fleet visibility, improved regulatory compliance, increased operational efficiency, and reduced administrative overheads, making it a valuable asset for fleet management across various industries.

Advanced Telematics & Remote Tacho Downloads

—
Easily manage tachograph downloads, vehicle tracking and
advanced telematics using our comprehensive system
—

DOT Advanced Telematics + Remote Tacho Downloads

DOT ADVANCED
TELEMATICS

DOT Tracking Advanced Telematics delivers real-time visibility and provides the most accurate data possible, including vehicle acceleration, braking, idling time, fuel mpg, engine load, cruise control and more.

By examining the finer details, you can discover concealed patterns and potential issues. This will enable you to boost efficiency and enhance driver behaviour. Improve driver performance, decrease unnecessary excessive engine idling, reduce fuel costs, monitor cruise control, and lessen wear and tear on the vehicle.

Analyse live critical driver behaviour, identify issues quickly and provide feedback to your drivers through the driver debrief reporting system. Allow drivers to track their driving score via the Tachomaster app and proactively empower them to recognise terrible driving styles and adjust their driving accordingly.

The benefits of advanced telematics with remote tachograph downloads*

Live Fuel Data & History

Monitor live fuel levels and receive the most accurate fuel data by taking the data directly from the CAN-Bus and helping prevent fuel thefts.

Speed Data

Receive the most accurate speed data directly from the CAN-Bus. Instantly see the speed and the direction your vehicles are travelling.

Driver & Vehicle Analytics

Gain detailed, valuable driving analytics from acceleration, idling time, braking, live fuel mpg, engine load, and cruise control to maximise your bottom line.

Fleet Summary dashboard

View crucial fleet data instantly, gain a general overview of how your fleet is being utilised and performing, and drill into more detailed data.

Driver & Vehicle Grading

Identify poor driving habits and improve driver behaviour via the grading system that provides profile data about your drivers and vehicle's performances.

Grading Performance Table

Proactively empower your drivers via the driver performance table and change driver behaviour to improve safety and increase fuel savings.

Driver Debrief Report

Provide feedback to your drivers via our driver debrief reporting and help them recognise bad driving styles and adjust their driving accordingly.

Odo & Distance Report

View live mileage and create a more detailed report with a breakdown of the distance travelled and mileage from start to finish within a specific time.

Suite of CAN-BUS Reports

Access crucial CAN-Bus reports to review performances and see exactly where improvements can be made in driving efficiency and safety.

Score & MPG Summary

Access a summary of driving scores and mpg data to compare scores and mpg to gain an overview of driver styles and mpg efficiency.

Weekly Summary Report

Review a summary of a specific week from a selected day, including start and end times, to view vehicle usage and the distance covered within that time.

Remote Tacho Downloads*

The DOT Tracking device provides live remote tachograph data of your drivers' and vehicles' activities directly onto the Tachomaster dashboards.

DOT Trailer Tracker Device

Our DOT Trailer Tracker device is
specially designed for tracking trailers

**DOT TRAILER
TRACKER**

Track your trailer with a DOT Trailer Tracker device

Our NEW DOT Trailer Tracker device has been designed specifically for tracking trailers. Small, highly durable units are the perfect way to keep abreast of your trailers and know where they are 24/7.

Gain greater visibility over your assets and always maintain touch with your trailers in transit or in the yard again. The DOT Tracking user-friendly dashboard can quickly detect and locate parked or missing trailers and prevent trailer thefts and unauthorised usage.

Our innovative trailer tracking solution improves trailer-to-tractor ratios and increases revenue by redeploying under-utilised trailers. The built-in rechargeable battery will last up to 7 days and recharge once the trailer is hooked up. Any trailer movements will activate the tracking sensors.

Through our DOT Tracking cloud-based platform, you can view, monitor and track your trailers in real-time. Know the location of every trailer within your fleet and get key vehicle tracking metrics.

Our commitment to your security

At Road Tech, we prioritise security and excellence in everything we do. Our **ISO 27001:2022** certification is not just a credential; it demonstrates our relentless dedication to protecting your information and providing solutions that you can trust. Partner with us for resilient outcomes that ensure your peace of mind.

ISO 27001 Certification:

At Road Tech, security has always been a core priority. Our ISO 27001:2022 certification reflects our unwavering dedication to safeguarding information and delivering secure, resilient, and trustworthy solutions to our clients.

We hold ISO 27001 certification across all our software products: Tachomaster, DOT Tracking, Roadrunner, Checkmaster, and PreDrive. This internationally recognised certification demonstrates our robust Information Security Management System (ISMS) and reinforces our commitment to maintaining the highest standards of confidentiality, integrity, and availability of client data.

What is ISO 27001?

ISO 27001 is the international standard for Information Security Management Systems (ISMS) standard. It provides a comprehensive and systematic framework for managing sensitive company and customer information, ensuring it remains secure and protected against cyber threats, data breaches, and unauthorised access. By adhering to the rigorous requirements of ISO 27001, organisations demonstrate their commitment to safeguarding information, mitigating risks, and fostering trust with their clients and partners.

The Journey to ISO 27001

Achieving ISO 27001 certification is no small feat. The process requires a deep and comprehensive evaluation of an organisation's policies, processes, and controls to ensure they align with the standard's requirements.

At Road Tech, we always take a proactive and structured approach to all challenges, included ISO 27001:

Assessing Current Practices: We began by thoroughly auditing our existing information security practices. This helped us identify strengths, pinpoint improvement areas, and define a clear roadmap toward compliance.

Developing Robust Policies: We established and refined our information security policies, which are designed to protect sensitive data, manage risks, and ensure compliance with regulatory requirements. These policies address areas such as access controls and encryption, incident response, and employee awareness.

Employee Engagement and Training: Information security is a shared responsibility; our team has been at the heart of this journey. We conducted comprehensive training sessions to raise awareness about the importance of information security and ensure all employees understood their roles in maintaining it.

Implementing New Technologies: To enhance our security posture, we invested in cutting-edge technologies and tools that align with ISO 27001 standards. These solutions enable us to monitor, detect, and respond to potential threats efficiently.

Continuous Improvement: Achieving ISO 27001 certification is not a one-time effort. We have established robust internal audit processes, management reviews, and continual improvement cycles to ensure our ISMS evolves with the changing threat landscape. This commitment to continuous improvement should reassure our clients and partners of our dedication to their security.

The Benefits for Our Clients

Achieving ISO 27001 certification isn't just an internal accomplishment; it's a commitment to our clients and their peace of mind. Here are some of the ways this Certification has made a difference for our clients:

Enhanced Data Security: Clients can trust that their information is handled within a framework that meets internationally recognised information security standards.

Proactive Risk Management: By continuously identifying, assessing, and treating risks, we reduce the likelihood of security incidents and service disruptions.

Regulatory and Contractual Compliance: ISO 27001 supports alignment with legal, regulatory, and contractual obligations, reducing compliance-related risks.

Increased Trust and Transparency: ISO 27001 certification demonstrates our dedication to transparency and accountability, strengthening our clients' trust.

Competitive Advantage: Partnering with an ISO 27001 certified organisation demonstrates a shared commitment to operational excellence and security, giving our clients a clear edge in the marketplace.

Looking Ahead

We remain focused on building a culture of security and continuous improvement. ISO 27001 certification is not the end of the road but a foundation for future growth and innovation. We're committed to maintaining the highest standards and delivering secure, dependable solutions that empower our clients to succeed.

We extend our heartfelt gratitude to every member of the Road Tech team for their dedication and hard work in setting the highest benchmarks for excellence and security in our industry.

The future of fleet management

Discover how to plan, monitor, manage, report and capture results. Our software can highlight anomalies, expose patterns, simplify daily operations and help drive continuous improvements.
