Unique features from the DOT Vehicle Manager app

Experience a new level of efficiency with the DOT Vehicle Manager app. Its unique features will boost fleet visibility and help you seamlessly monitor the activity of your vehicles, drivers, compliance, safety and deliveries, ensuring unparalleled visibility throughout your operations.

Live Tachograph Data

View live tacho drive periods, including rest and break times and the locations of breaks.

Live Vehicle Details

View details include reg, status, latest GPS, tacho mode, mileage, speed, and fuel.

Walk Around Checks

View the latest daily vehicle walk-around reports and the current vehicle status.

Collection & Deliveries

View all the delivery jobs for a vehicle and all completed collection and delivery times.

DOT prices

Option 01 Remote Tacho Downloads **£14.95pm***

Add Vehicle Tracking For £5 Extra

Gain immediate access to crucial tachograph analysis and revolutionise the way you handle tacho compliance, driver hours, and WTD regulations. You can now collect all tacho data on a daily and remotely, which makes it simple to track your driver's availability, work, drive, and rest periods in real-time.

Option 02 Vehicle Tracking **£14.95pm**

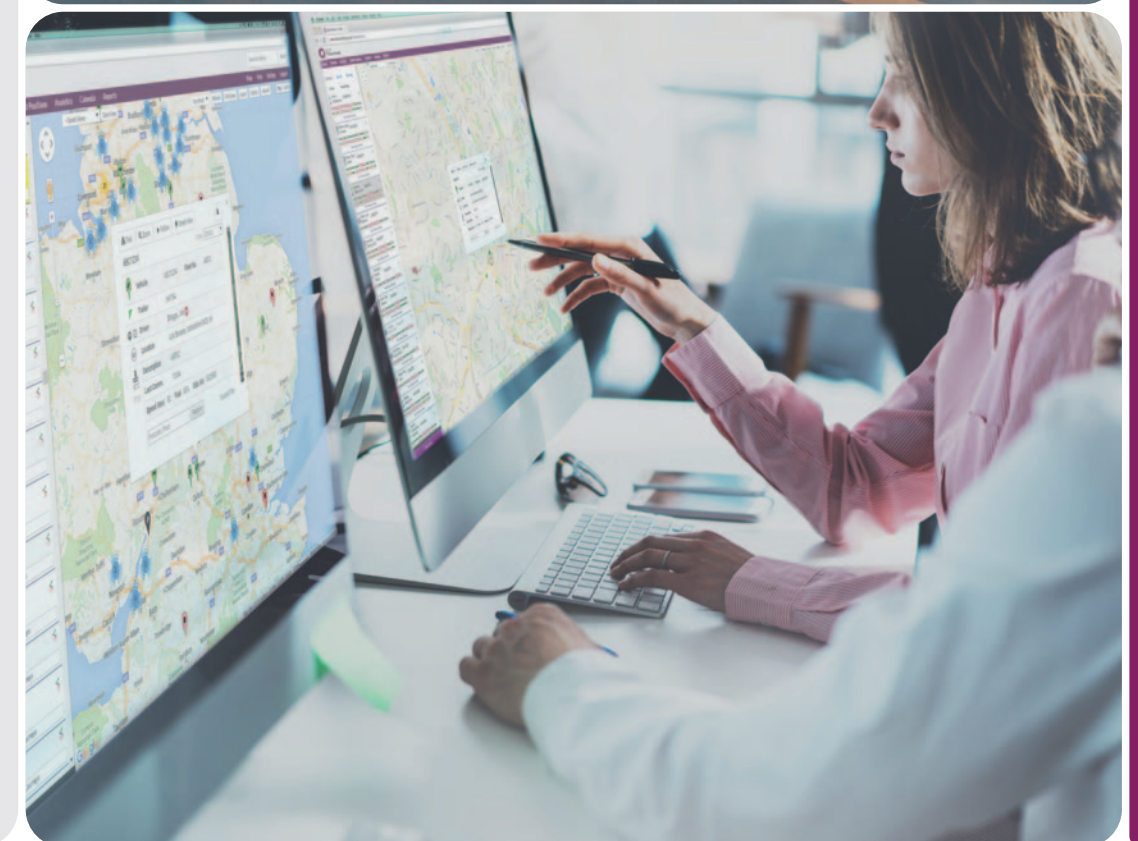

Add Remote Tacho Downloads For £5 Extra

DOT Tracking offers real-time vehicle tracking, allowing you to monitor your fleet via an intuitive web-based interface and detailed road maps. Locate your vehicle's current position, track its route history, and compare routes for efficiency. You can also locate vehicles closest to a specific area and set filters to watch particular vehicles and drivers.

Option 03 Advanced Telematics **£32.95pm****

Includes Vehicle Tracking & Remote Tacho Downloads

DOT Tracking Advanced Telematics provides real-time visibility of your fleet, allowing you to monitor essential data such as acceleration, braking, idle time, fuel usage, miles per gallon, mileage, engine load, and cruise control. You can also analyse critical driver behaviour, identify issues quickly, and provide driver feedback through the driver debriefing system. Additionally, you can access live tachograph analysis, compliance information, driver hours, and WTD rules.

Our commitment to your security

At Road Tech, we prioritise security and excellence in everything we do. Our **ISO 27001:2022** certification is not just a credential; it demonstrates our relentless dedication to protecting your information and providing solutions that you can trust. Partner with us for resilient outcomes that ensure your peace of mind.

ISO 27001 Certification:

At Road Tech, security has always been a core priority. Our ISO 27001:2022 certification reflects our unwavering dedication to safeguarding information and delivering secure, resilient, and trustworthy solutions to our clients.

We hold ISO 27001 certification across all our software products: Tachomaster, DOT Tracking, Roadrunner, Checkmaster, and PreDrive. This internationally recognised certification demonstrates our robust Information Security Management System (ISMS) and reinforces our commitment to maintaining the highest standards of confidentiality, integrity, and availability of client data.

What is ISO 27001?

ISO 27001 is the international standard for Information Security Management Systems (ISMS) standard. It provides a comprehensive and systematic framework for managing sensitive company and customer information, ensuring it remains secure and protected against cyber threats, data breaches, and unauthorised access. By adhering to the rigorous requirements of ISO 27001, organisations demonstrate their commitment to safeguarding information, mitigating risks, and fostering trust with their clients and partners.

The Journey to ISO 27001

Achieving ISO 27001 certification is no small feat. The process requires a deep and comprehensive evaluation of an organisation's policies, processes, and controls to ensure they align with the standard's requirements.

At Road Tech, we always take a proactive and structured approach to all challenges, included ISO 27001:

Assessing Current Practices: We began by thoroughly auditing our existing information security practices. This helped us identify strengths, pinpoint improvement areas, and define a clear roadmap toward compliance.

Developing Robust Policies: We established and refined our information security policies, which are designed to protect sensitive data, manage risks, and ensure compliance with regulatory requirements. These policies address areas such as access controls and encryption, incident response, and employee awareness.

Employee Engagement and Training: Information security is a shared responsibility; our team has been at the heart of this journey. We conducted comprehensive training sessions to raise awareness about the importance of information security and ensure all employees understood their roles in maintaining it.

Implementing New Technologies: To enhance our security posture, we invested in cutting-edge technologies and tools that align with ISO 27001 standards. These solutions enable us to monitor, detect, and respond to potential threats efficiently.

Continuous Improvement: Achieving ISO 27001 certification is not a one-time effort. We have established robust internal audit processes, management reviews, and continual improvement cycles to ensure our ISMS evolves with the changing threat landscape. This commitment to continuous improvement should reassure our clients and partners of our dedication to their security.

The Benefits for Our Clients

Achieving ISO 27001 certification isn't just an internal accomplishment; it's a commitment to our clients and their peace of mind. Here are some of the ways this Certification has made a difference for our clients:

Enhanced Data Security: Clients can trust that their information is handled within a framework that meets internationally recognised information security standards.

Proactive Risk Management: By continuously identifying, assessing, and treating risks, we reduce the likelihood of security incidents and service disruptions.

Regulatory and Contractual Compliance: ISO 27001 supports alignment with legal, regulatory, and contractual obligations, reducing compliance-related risks.

Increased Trust and Transparency: ISO 27001 certification demonstrates our dedication to transparency and accountability, strengthening our clients' trust.

Competitive Advantage: Partnering with an ISO 27001 certified organisation demonstrates a shared commitment to operational excellence and security, giving our clients a clear edge in the marketplace.

Looking Ahead

We remain focused on building a culture of security and continuous improvement. ISO 27001 certification is not the end of the road but a foundation for future growth and innovation. We're committed to maintaining the highest standards and delivering secure, dependable solutions that empower our clients to succeed.

We extend our heartfelt gratitude to every member of the Road Tech team for their dedication and hard work in setting the highest benchmarks for excellence and security in our industry.

The future of fleet management

Discover how to plan, monitor, manage, report and capture results. Our software can highlight anomalies, expose patterns, simplify daily operations and help drive continuous improvements.
