check

Automate driver licence checks effortlessly

As an authorised DVLA driver licence checking system, Checkmaster informs you of a driver's licence status, endorsement points and the level of driving entitlement.

Use Checkmaster to schedule and automate your driver's licence checks against any relevant compliance issues; penalty points increases, expiries, revoked or disqualified driver licenses. Control your entire fleet more efficiently and reduce potential issues by increasing driving licence checks for high-risk drivers and reducing checks for low-risk drivers.

Checkmaster is quick and easy to use and gives you a dated history of all the checks you have carried out on a driver's licence. Regardless of how many drivers you employ, compliance, safety and duty of care are essential in today's regulatory world.

Making sure your employees are legally licensed to drive

Checkmaster provides real-time updates on license status, endorsement points, and driving entitlement. Automating checks for compliance issues like penalty points and expirations reduces non-compliance risks and improves fleet management efficiency.

Instant Driving
Licence Checks

Checkmaster's driving licence checking service lets you quickly check a driver's licence. Ensure your employees are appropriately validated and licensed; stay compliant and protect your operating licence and safety record.

Checkmaster is an authorised DVLA driver licence checking system

Checkmaster will electronically validate your employee's driving licenses as an authorised DVLA driving licence checking software system. Checkmaster online licence checking service provides a driving licence status, including penalty points, disqualifications and vehicle entitlement to drive.

Checkmaster provides an instant DVLA driver's licence check

Everything you need to know about your employee's driving licence is just a few clicks away. Checkmaster will instantly perform a DVLA driver's licence status check, giving you an entitlement verification check against your employee's HGV, LGV, PSV or car driver's license. Checkmaster will tell you if your employee's driving status is legal, valid and up-to-date against current DVLA records.

Automatically schedule your driver's licence checks

Checkmaster will automatically schedule and configure your driving licence checks to suit your requirements. The frequency of your checks can be reviewed depending on your company policy or each driver's risk profile.

Checkmaster alerts you of any driving licence issues

Checkmaster will automatically inform you of relevant compliance issues, helping you minimise the risk by being aware of your employee's driving licence status. Checkmaster provides warnings so that you can take immediate action in case of penalty point increases, expiries, revoked or disqualified driver licenses.

Configurable driving licence checks for high-risk drivers

Checkmaster settings allow you to configure various driving licence check periods for high-risk and low-risk drivers. Manage the entire checking process more efficiently and reduce potential risks by increasing driving licence checks for high-risk drivers and reducing checks for low-risk drivers. Checkmaster has three different levels of driver points warnings system. Green, amber and red, red being the most critical.

Know which drivers are entitled to drive specific vehicles

Checkmaster will check the different driving licence categories of entitlement against your employee's driving licence records. Consequently, you can determine which types of vehicles your drivers are appropriately validated and licensed to drive.

Unique features from Checkmaster

Checkmaster automates licence checks and provides real-time updates on status and endorsements. It optimises fleet management by prioritising high-risk drivers and maintaining a complete audit trail. Easy to use and quick to implement, Checkmaster streamlines operations and supports your duty of care.

Driver Licence Checks

Manage Any Driving
Licence Issues Quickly
Via Checkmaster

Be confident that your drivers are appropriately licensed and minimise the risk of employing unqualified or disqualified drivers. Checkmaster offers peace of mind and ensures your employees are legally safe and entitled to drive.

Checkmaster will ensure your employees are legal to drive

Checkmaster ensures that your employees are appropriately validated and licensed to drive. Checkmaster will help protect your company's 'O' licence and safety record. Reduce administrative burdens, stay compliant and remove unnecessary risks to your business.

Checkmaster reduces the risk of incorrect information

Reduce the risk of inaccurate information and ensure your employee's driving licence records have been carefully checked using our DVLA-compliant driving licence-checking software.

Lower costs by reducing less critical driver's licence checks

Reduce your less essential driving licence checks and focus on the driver's licences that need checking more frequently.

Checkmaster will record and store your licence checks

Checkmaster provides permanent, secure and comprehensive records of every driving licence check. Checkmaster will organise and manage your employee's driving licence checks and supply a detailed historical audit trail.

View your driving licence status from within Tachomaster

Checkmaster customers can save time and hassle by viewing the licence status of each driver from within Tachomaster if they are a Tachomaster customers.

No hidden charges and no long-term contracts

As with all Road Tech products and services, there are no hidden charges, and you don't have to sign a long-term contract. Our customers stay with us because we offer innovative software products, transparent, straightforward pricing and are continuously developing our software.

Go paperless with our latest secure online sign-up process

We've added a new online system to remove the painfully slow paper mandate process. Swiftly gain permission to enable you to check your employee's driving licence details via our NEW (eDPD) system.

What is an eDPD system?

The Electronic Data Protection Declaration (eDPD) is a way to allow drivers to electronically authorise companies to check their entitlement to drive.

How does the Checkmaster eDPD system work?

Instead of a driver having to sign a piece of paper, use Checkmaster to input the driver's information and then send the driver an email and security code by text to enable them to sign-up online securely.

The driver can check their driving license details are correct in a simple, secure web form and update any details if necessary. Once the driver is happy, they confirm that they agree to the terms and sign the eDPD mandate with a digital signature, and their entitlement to drive can be checked.

Five steps to checking your driver's entitlement to drive

We've added a new effortless way to sign-up your drivers to Checkmaster via our eDPD system.

Step 1

Input Basic Driver Information Via Checkmaster

The basic details required are name, email, mobile and licence number

Step 2

Send Your Driver A Sign-up Email Via Checkmaster

Via the Checkmaster system, send the sign-up details to the driver

Step 3

Driver Confirms Email & Receives SMS Code To Their Mobile

The driver accepts the email and receives a 2FA SMS code to their mobile phone

Step 4

Driver Adds Details, Then Checks & Confirms Terms of Declaration

Approved eDPD mandates are securely signed via a digital signature system

Step 5

You're Good To Go! You're Now Covered For Three Years

The declaration is tamper-proof, and the driver's licence can now be checked

Our commitment to your security

At Road Tech, we prioritise security and excellence in everything we do. Our **ISO 27001:2022** certification is not just a credential; it demonstrates our relentless dedication to protecting your information and providing solutions that you can trust. Partner with us for resilient outcomes that ensure your peace of mind.

ISO 27001 Certification:

At Road Tech, security has always been a core priority. Our ISO 27001:2022 certification reflects our unwavering dedication to safeguarding information and delivering secure, resilient, and trustworthy solutions to our clients.

We hold ISO 27001 certification across all our software products: Tachomaster, DOT Tracking, Roadrunner, Checkmaster, and PreDrive. This internationally recognised certification demonstrates our robust Information Security Management System (ISMS) and reinforces our commitment to maintaining the highest standards of confidentiality, integrity, and availability of client data.

What is ISO 27001?

ISO 27001 is the international standard for Information Security Management Systems (ISMS) standard. It provides a comprehensive and systematic framework for managing sensitive company and customer information, ensuring it remains secure and protected against cyber threats, data breaches, and unauthorised access. By adhering to the rigorous requirements of ISO 27001, organisations demonstrate their commitment to safeguarding information, mitigating risks, and fostering trust with their clients and partners.

The Journey to ISO 27001

Achieving ISO 27001 certification is no small feat. The process requires a deep and comprehensive evaluation of an organisation's policies, processes, and controls to ensure they align with the standard's requirements.

At Road Tech, we always take a proactive and structured approach to all challenges, included ISO 27001:

Assessing Current Practices: We began by thoroughly auditing our existing information security practices. This helped us identify strengths, pinpoint improvement areas, and define a clear roadmap toward compliance.

Developing Robust Policies: We established and refined our information security policies, which are designed to protect sensitive data, manage risks, and ensure compliance with regulatory requirements. These policies address areas such as access controls and encryption, incident response, and employee awareness.

Employee Engagement and Training: Information security is a shared responsibility; our team has been at the heart of this journey. We conducted comprehensive training sessions to raise awareness about the importance of information security and ensure all employees understood their roles in maintaining it.

Implementing New Technologies: To enhance our security posture, we invested in cutting-edge technologies and tools that align with ISO 27001 standards. These solutions enable us to monitor, detect, and respond to potential threats efficiently.

Continuous Improvement: Achieving ISO 27001 certification is not a one-time effort. We have established robust internal audit processes, management reviews, and continual improvement cycles to ensure our ISMS evolves with the changing threat landscape. This commitment to continuous improvement should reassure our clients and partners of our dedication to their security.

The Benefits for Our Clients

Achieving ISO 27001 certification isn't just an internal accomplishment; it's a commitment to our clients and their peace of mind. Here are some of the ways this Certification has made a difference for our clients:

Enhanced Data Security: Clients can trust that their information is handled within a framework that meets internationally recognised information security standards.

Proactive Risk Management: By continuously identifying, assessing, and treating risks, we reduce the likelihood of security incidents and service disruptions.

Regulatory and Contractual Compliance: ISO 27001 supports alignment with legal, regulatory, and contractual obligations, reducing compliance-related risks.

Increased Trust and Transparency: ISO 27001 certification demonstrates our dedication to transparency and accountability, strengthening our clients' trust.

Competitive Advantage: Partnering with an ISO 27001 certified organisation demonstrates a shared commitment to operational excellence and security, giving our clients a clear edge in the marketplace.

Looking Ahead

We remain focused on building a culture of security and continuous improvement. ISO 27001 certification is not the end of the road but a foundation for future growth and innovation. We're committed to maintaining the highest standards and delivering secure, dependable solutions that empower our clients to succeed.

We extend our heartfelt gratitude to every member of the Road Tech team for their dedication and hard work in setting the highest benchmarks for excellence and security in our industry.

The future of fleet management
