Capture and record every vehicle check

The PreDrive smartphone app is a safe, innovative, and more efficient way of performing a driver's daily walk-around vehicle check. PreDrive eliminates paperwork, streamlines operations, records and tracks your vehicle checks to ensure your fleet is safe, compliant and roadworthy.

Create unlimited bespoke walk-around checklist templates for trucks, coaches, buses, vans, taxis or company cars. Record your vehicle checks, including all defects, repairs and maintenance data. PreDrive is DVSA compliant, provides a complete audit trail of damage reports, and tracks vehicle defects through to rectification.

Simplify and record workshop processes and fleet management communication using the simple, actionable, click-through vehicle servicing workflow dashboard. The vehicle maintenance scheduling calendar will help you manage your vehicle's maintenance, servicing and MOT dates.

All completed walk-around checks are sent automatically to the PreDrive website dashboard. You will then be alerted to any issues via the dashboard or the Road Tech Notifier.

PreDrive driver tasks

The PreDrive app revolutionises daily vehicle checks by eliminating paperwork and streamlining operations. It allows drivers to follow bespoke walk-around checklist templates, record defects, and ensure fleet safety and compliance.

Have A Complete
Audit Trail From
Start to Finish

PreDrive is a powerful system that records, reports and analyses your vehicle checks and provides a complete audit trail. PreDrive enables your fleet controller to quickly assess any vehicle or trailer issues and advise your drivers, workshops or maintenance provider accordingly.

Simplify your vehicle checks

Ensure your drivers complete their walk-around vehicle checks thoroughly, accurately and efficiently. PreDrive is a powerful system that helps check, record, report and analyse your vehicle inspections.

Easily customise your checks

You can easily create bespoke walk-around vehicle inspection checklist templates for trucks, coaches, buses, vans, taxis or company cars. The DVSA-compliant unlimited vehicle check templates can be easily adapted to suit any requirements, providing greater flexibility and precision.

Roadside checks

PreDrive provides drivers a safe and easy way to record and report any vehicle or trailer problems. The 'Roadside Check' lets your drivers quickly highlight any vehicle issues without doing a full walk-around check again, saving them time during their busy shifts.

Automatic alerts

All completed vehicle checks are sent automatically to the PreDrive website dashboard, giving automatic warnings of all reported vehicle issues, failures or damage. Swiftly evaluate, review, manage and organise your drivers, vehicles and workshops or alert your maintenance provider with PreDrive.

View vehicle locations

Examine how many daily walk-around vehicle checks passed or failed and drill down into specific defects and damage reports to discover more details.

Each vehicle check is time and date-stamped and kept in chronological order to prove when and where the inspection occurred. All completed daily vehicle checks are saved securely on our servers and are instantly available at the touch of a button.

Retain a full audit trail

PreDrive records and stores a comprehensive audit trail of all completed vehicle checks. Keep your inspection records safe and demonstrate to the DVSA that you have the correct processes and systems in place.

Reduce your risks

Record defects accurately and quickly, reduce errors and inefficiencies and eliminate misinterpreted information. PreDrive will provide a complete and accurate record of your driver's vehicle checks.

Minimise vehicle downtime

Minimise vehicle downtime by instantly alerting your workshop or maintenance provider to vehicle issues, including PG9s that require immediate attention. View instant notifications, vital comments, and emails linked to your vehicle checks within one dashboard.

Unique features from PreDrive

Records Check Timings

PreDrive records the time your driver takes to complete a walk-around vehicle check so you know they are being performed correctly.

DVSA Compliant

Ensure your drivers perform their walk-around vehicle checks and report damage accurately and efficiently.

Automatic Warnings

PreDrive will automatically alert your traffic office of vehicle defects or vehicle damage issues that may require your immediate attention.

Tamper-Proof

Once data is recorded on the PreDrive mobile app, it cannot be altered. The check is time and date-stamped and completely secure.

Reduce Time & Admin Costs

PreDrive reduces and simplifies admin processes and eliminates the cost of running a laborious and endless paper-based system.

Pinpoint Checks

PreDrive can pinpoint the location of any walk-around vehicle check. The map location is included in all the PreDrive reports.

Got Signal Issues?

No worries! Perform your walk-around vehicle checks as usual. When the phone gets a signal, the data will automatically send.

Faster Vehicle Repairs

Improve internal comms, simplify processes, organise repairs, order parts early, rectify vehicle issues faster and reduce vehicle downtime.

Avoid Issues & Fines

PreDrive identifies non-compliant drivers who expose you to risks. Minimise downtime, stay compliant and keep your drivers safe.

The PreDrive smartphone app is a safer, more intelligent and more efficient way of performing your daily walk-around vehicle check. Eliminate paperwork, reduce errors, and record and track vehicle checks to ensure your fleet is safe, compliant and roadworthy.

Other key features:

Your walk-around vehicle checks can include a fitness to drive declaration, items of safety clothing or required paperwork you decide! Check templates are unlimited, and you can easily customise them to your requirements.

A comprehensive range of reports

All daily vehicle checks have an audit trail and are stored automatically on Road Techs servers for three years.

Manage your vehicle issues quickly

Once a fault is discovered, a report can instantly be sent to your workshop or third-party maintenance provider. The workshop staff can immediately schedule and organise the repair, order parts, and minimise vehicle downtime on receiving the report.

Records the time it takes to do a check

You decide how long your drivers should take to do each vehicle check. You can run a report identifying any check that has taken less than the allotted time.

PreDrive & Tachomaster integration

PreDrive integrates with Tachomaster and matches a tachograph shift record with a PreDrive check. Before doing a walk-around check, checks can include whether the driver has inserted the driver's card into the tachograph unit.

Pinpoint the location of your checks

PreDrive can pinpoint the location of a vehicle when a daily walk-around vehicle check is performed, and map locations are recorded in the PreDrive reports.

PreDrive auto completes a vehicle reg

As you start to type in a vehicle registration number, PreDrive will automatically offer you the appropriate vehicle check for that vehicle.

Secure and tamper-proof

The data cannot be altered once a PreDrive vehicle check has been completed. Check inspection items must be completed; the PreDrive app will only allow the inspection to continue once all checks have been completed.

Upload third parties repair documents

If a third party repairs a fault when the vehicle is on the road. In that case, the driver can upload the third-party repair sheet document directly onto PreDrive, enabling the traffic office to receive the information immediately.

Images are stored in a picture library

All vehicle damage photographs relating to each vehicle can be stored in a picture library, making the images easy to locate and refer to.

Simplify processes and improve internal communication

The PreDrive role-based dashboards have been designed to simplify internal communication and highlight vehicles that require attention. The dashboard provides a simple click-through actionable system to help deal with vehicle issues through to rectification. Every process stage is recorded, and an entire timeline audit trail is stored within the PreDrive dashboard.

All actions, including messages, conversations, photos and files, are organised and recorded in PreDrive against an issue number or vehicle registration. The PreDrive dashboard clearly shows progress, including live updates from each stage to completion.

PreDrive provides a collaborative workflow with a clear communication record between your teams. Share vehicle calendars and record services, safety inspections and MOTs in one place. Simplify workshop and fleet management processes and rectify vehicle issues faster. The results minimised downtime and safer vehicles on the road.

Maintenance, service and scheduling calendar

PreDrive gives you a digital record of your commercial vehicle's maintenance schedules and service records, enabling you to access the stored information instantly.

A Digital Calendar Of Your Maintenance Schedules

View Your Fleet's Service & MOT Schedule Instantly

Simplify Processes & Eliminate Repetitive Work

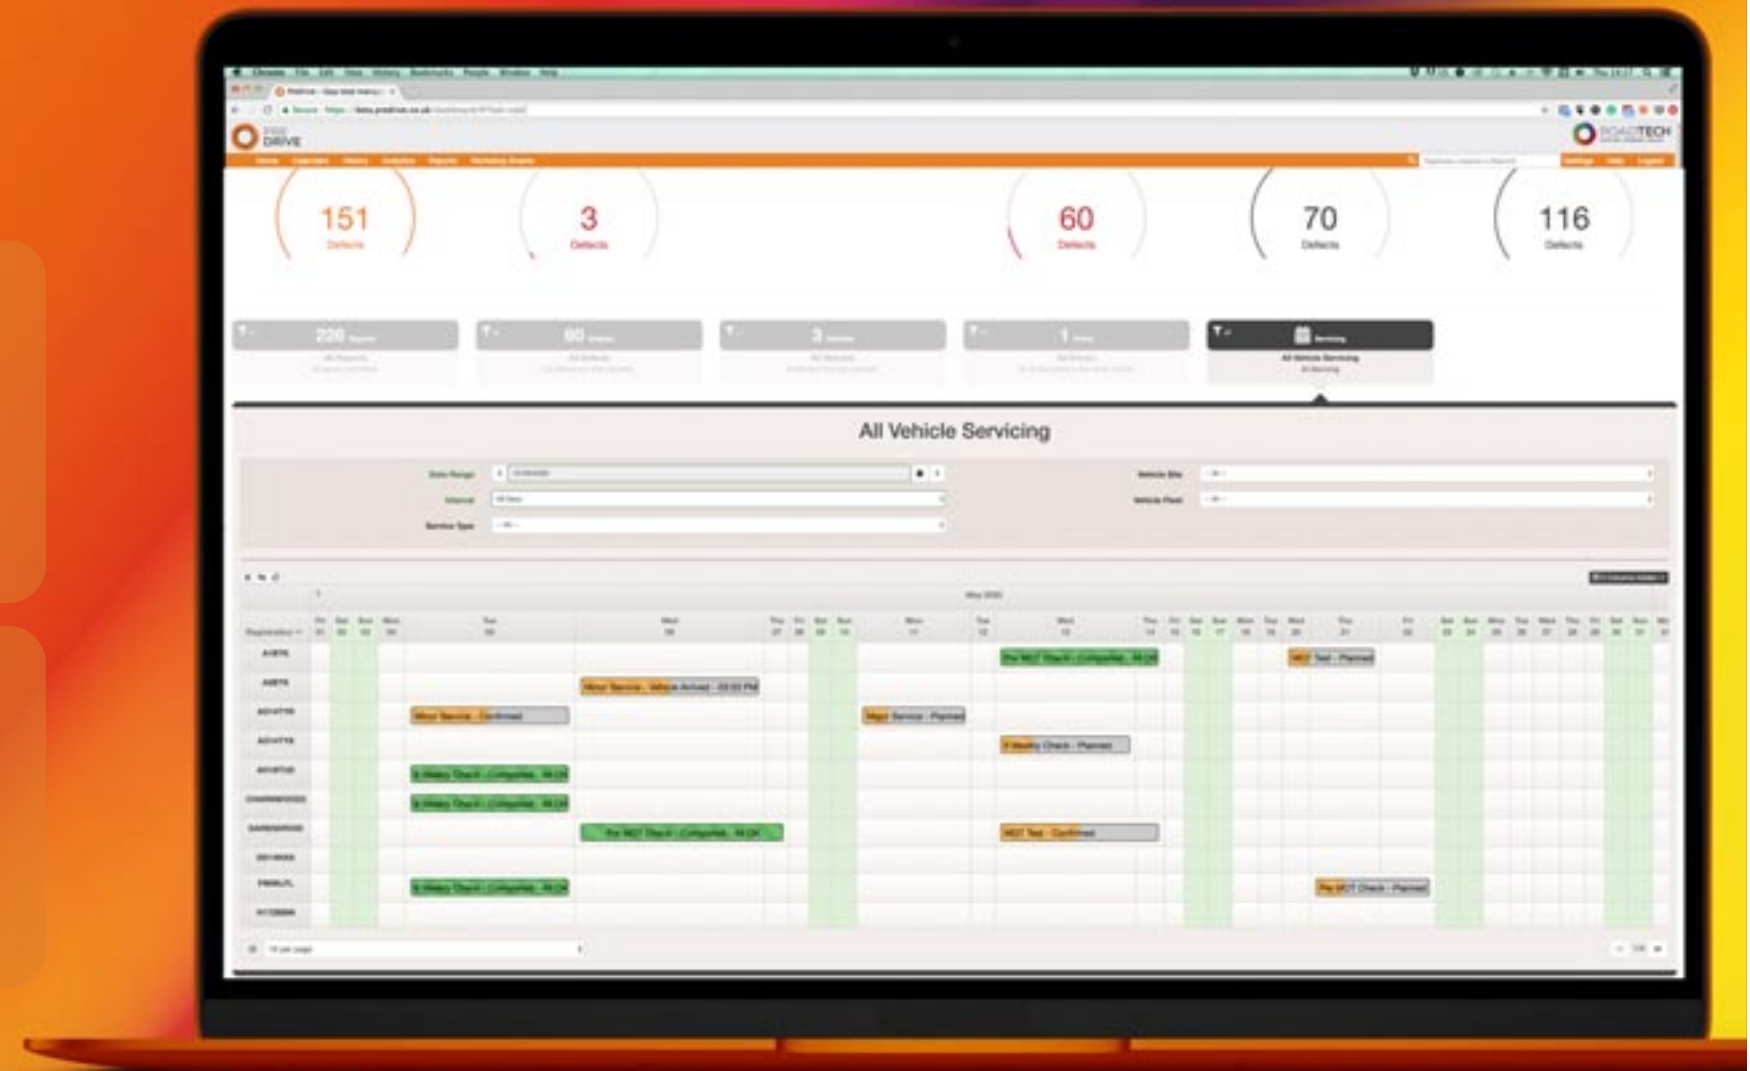

Never Miss A Vehicle Service Or MOT Date Again

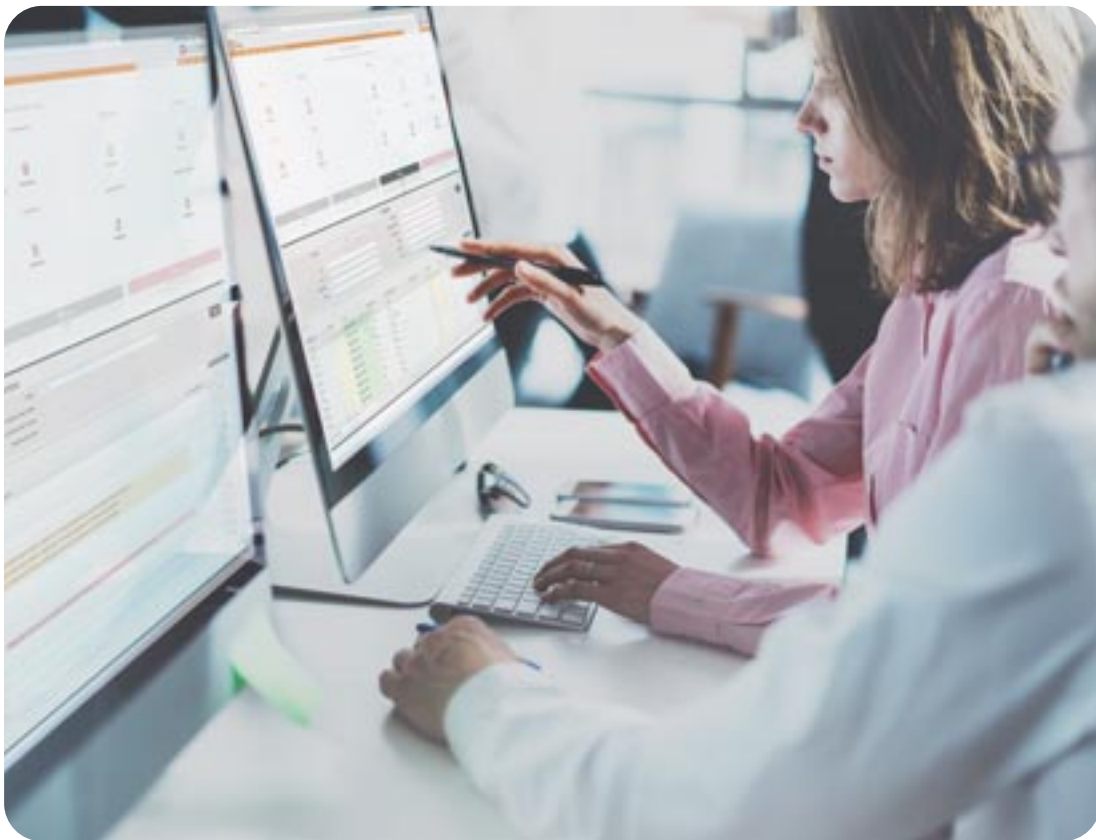

Ensure Your Fleet Is Safe, Roadworthy & Compliant

Minimise Vehicle Downtime & Save Admin Time

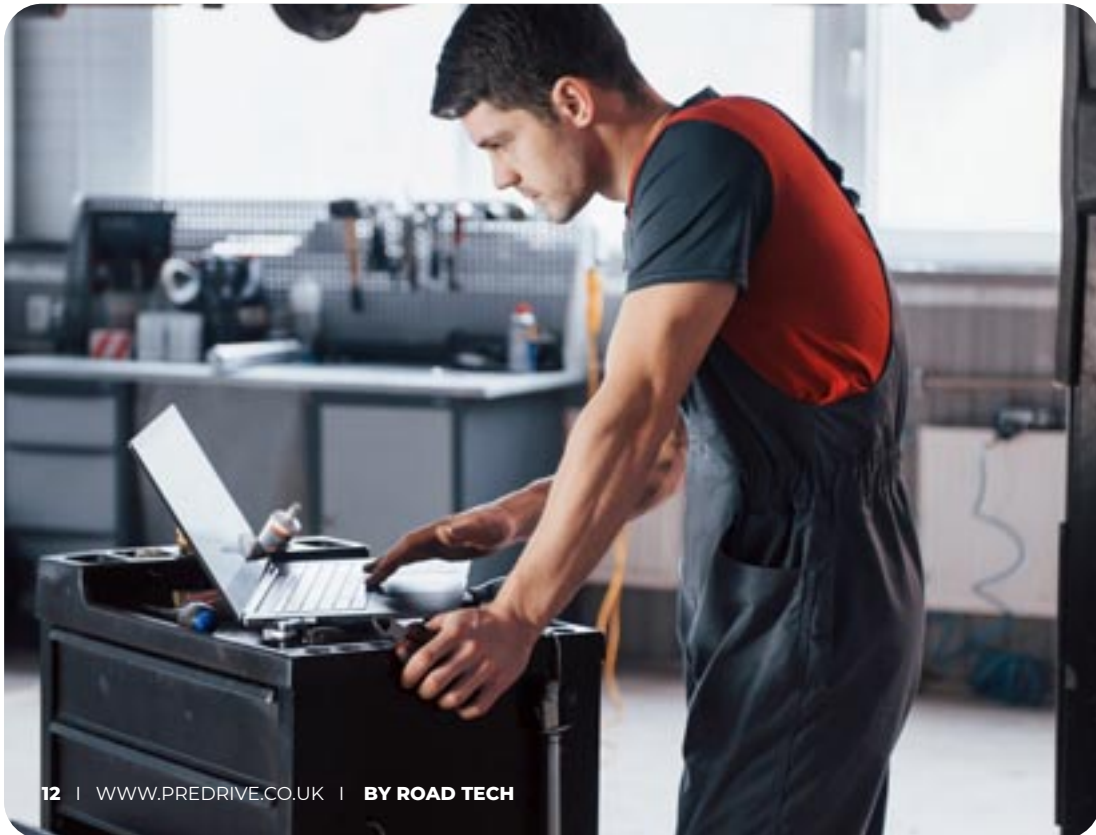

Secure and simple maintenance scheduling

PreDrive is proud to present a NEW online maintenance and scheduling calendar, a reliable tool that aids in the organisation, location, and management of your commercial vehicle maintenance servicing. With this, keeping track of the MOT schedule is now a secure and worry-free process.

Simplify processes, eliminate paperwork and gain an instant view of your fleet's servicing schedules via the PreDrive maintenance calendar. Never overlook a service or MOT date again or misplace paperwork.

Utilise the PreDrive workshop system to enhance internal communications and expedite the resolution of vehicle issues. This system minimises vehicle downtime, saves administrative time, and showcases best practices, making your operations more safe and efficient.

Our commitment to your security

At Road Tech, we prioritise security and excellence in everything we do. Our **ISO 27001:2022** certification is not just a credential; it demonstrates our relentless dedication to protecting your information and providing solutions that you can trust. Partner with us for resilient outcomes that ensure your peace of mind.

ISO 27001 Certification:

At Road Tech, security has always been a core priority. Our ISO 27001:2022 certification reflects our unwavering dedication to safeguarding information and delivering secure, resilient, and trustworthy solutions to our clients.

We hold ISO 27001 certification across all our software products: Tachomaster, DOT Tracking, Roadrunner, Checkmaster, and PreDrive. This internationally recognised certification demonstrates our robust Information Security Management System (ISMS) and reinforces our commitment to maintaining the highest standards of confidentiality, integrity, and availability of client data.

What is ISO 27001?

ISO 27001 is the international standard for Information Security Management Systems (ISMS) standard. It provides a comprehensive and systematic framework for managing sensitive company and customer information, ensuring it remains secure and protected against cyber threats, data breaches, and unauthorised access. By adhering to the rigorous requirements of ISO 27001, organisations demonstrate their commitment to safeguarding information, mitigating risks, and fostering trust with their clients and partners.

The Journey to ISO 27001

Achieving ISO 27001 certification is no small feat. The process requires a deep and comprehensive evaluation of an organisation's policies, processes, and controls to ensure they align with the standard's requirements.

At Road Tech, we always take a proactive and structured approach to all challenges, included ISO 27001:

Assessing Current Practices: We began by thoroughly auditing our existing information security practices. This helped us identify strengths, pinpoint improvement areas, and define a clear roadmap toward compliance.

Developing Robust Policies: We established and refined our information security policies, which are designed to protect sensitive data, manage risks, and ensure compliance with regulatory requirements. These policies address areas such as access controls and encryption, incident response, and employee awareness.

Employee Engagement and Training: Information security is a shared responsibility; our team has been at the heart of this journey. We conducted comprehensive training sessions to raise awareness about the importance of information security and ensure all employees understood their roles in maintaining it.

Implementing New Technologies: To enhance our security posture, we invested in cutting-edge technologies and tools that align with ISO 27001 standards. These solutions enable us to monitor, detect, and respond to potential threats efficiently.

Continuous Improvement: Achieving ISO 27001 certification is not a one-time effort. We have established robust internal audit processes, management reviews, and continual improvement cycles to ensure our ISMS evolves with the changing threat landscape. This commitment to continuous improvement should reassure our clients and partners of our dedication to their security.

The Benefits for Our Clients

Achieving ISO 27001 certification isn't just an internal accomplishment; it's a commitment to our clients and their peace of mind. Here are some of the ways this Certification has made a difference for our clients:

Enhanced Data Security: Clients can trust that their information is handled within a framework that meets internationally recognised information security standards.

Proactive Risk Management: By continuously identifying, assessing, and treating risks, we reduce the likelihood of security incidents and service disruptions.

Regulatory and Contractual Compliance: ISO 27001 supports alignment with legal, regulatory, and contractual obligations, reducing compliance-related risks.

Increased Trust and Transparency: ISO 27001 certification demonstrates our dedication to transparency and accountability, strengthening our clients' trust.

Competitive Advantage: Partnering with an ISO 27001 certified organisation demonstrates a shared commitment to operational excellence and security, giving our clients a clear edge in the marketplace.

Looking Ahead

We remain focused on building a culture of security and continuous improvement. ISO 27001 certification is not the end of the road but a foundation for future growth and innovation. We're committed to maintaining the highest standards and delivering secure, dependable solutions that empower our clients to succeed.

We extend our heartfelt gratitude to every member of the Road Tech team for their dedication and hard work in setting the highest benchmarks for excellence and security in our industry.

The future of fleet management

Discover how to plan, monitor, manage, report and capture results. Our software can highlight anomalies, expose patterns, simplify daily operations and help drive continuous improvements.
