£1 Per Driver Per Week

Over 350 million tacho downloads

Instant tachograph analysis from the undisputed market leader. Tachomaster has analysed over 350 million driver cards, charts and vehicle downloads since its launch in 2006. Tachomaster has transformed the industry, helping customers manage and improve their compliance, reduce infringements and control their drivers more effectively.

Tachomaster provides instant analysis, the most comprehensive set of ready-made reports, and detailed insights into your drivers and vehicle activities for LGV (HGV), coach and bus operators.

Join thousands of other companies, take the stress out of your tachograph analysis, and improve today's compliance and safety. Tachomaster gives you instant analysis and unrivalled management reporting with no joining fee or long-term contracts.

Why tachomaster is the undisputed market leader

Tachomaster gives you instant tacho analysis, unrivalled dashboards, and management reporting with no joining fee or long-term contracts to sign.

Manage Your Compliance Easily

Reduce Driver Infringements

Improve Your Fleet's Safety

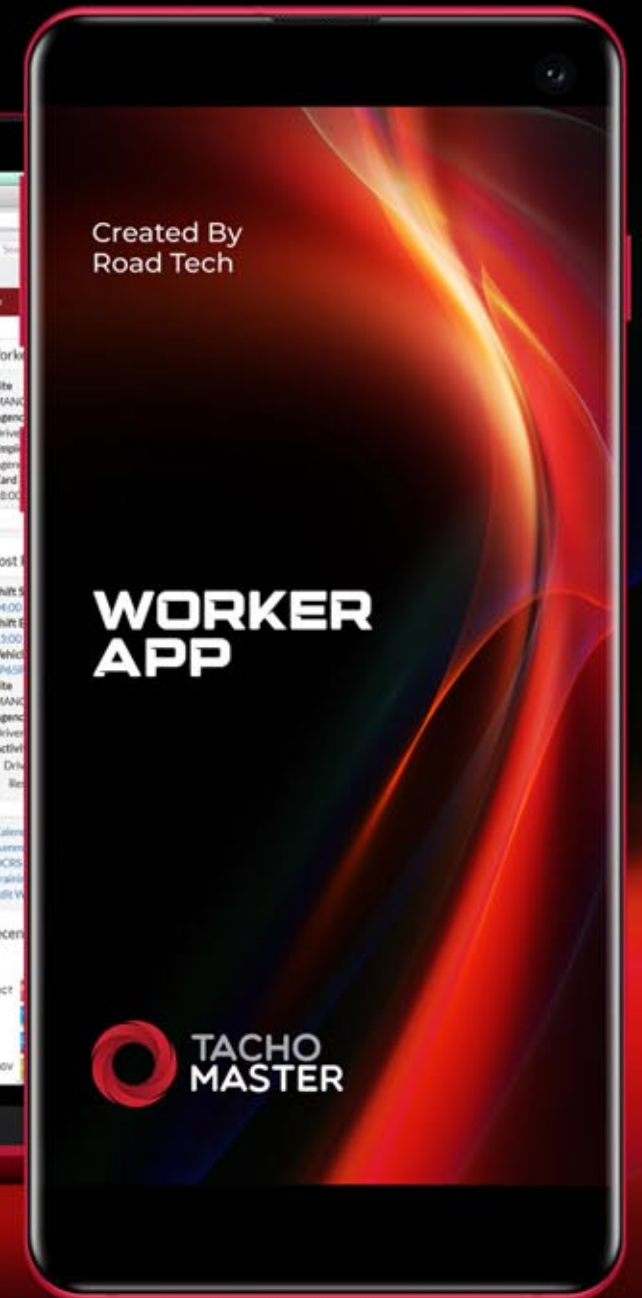

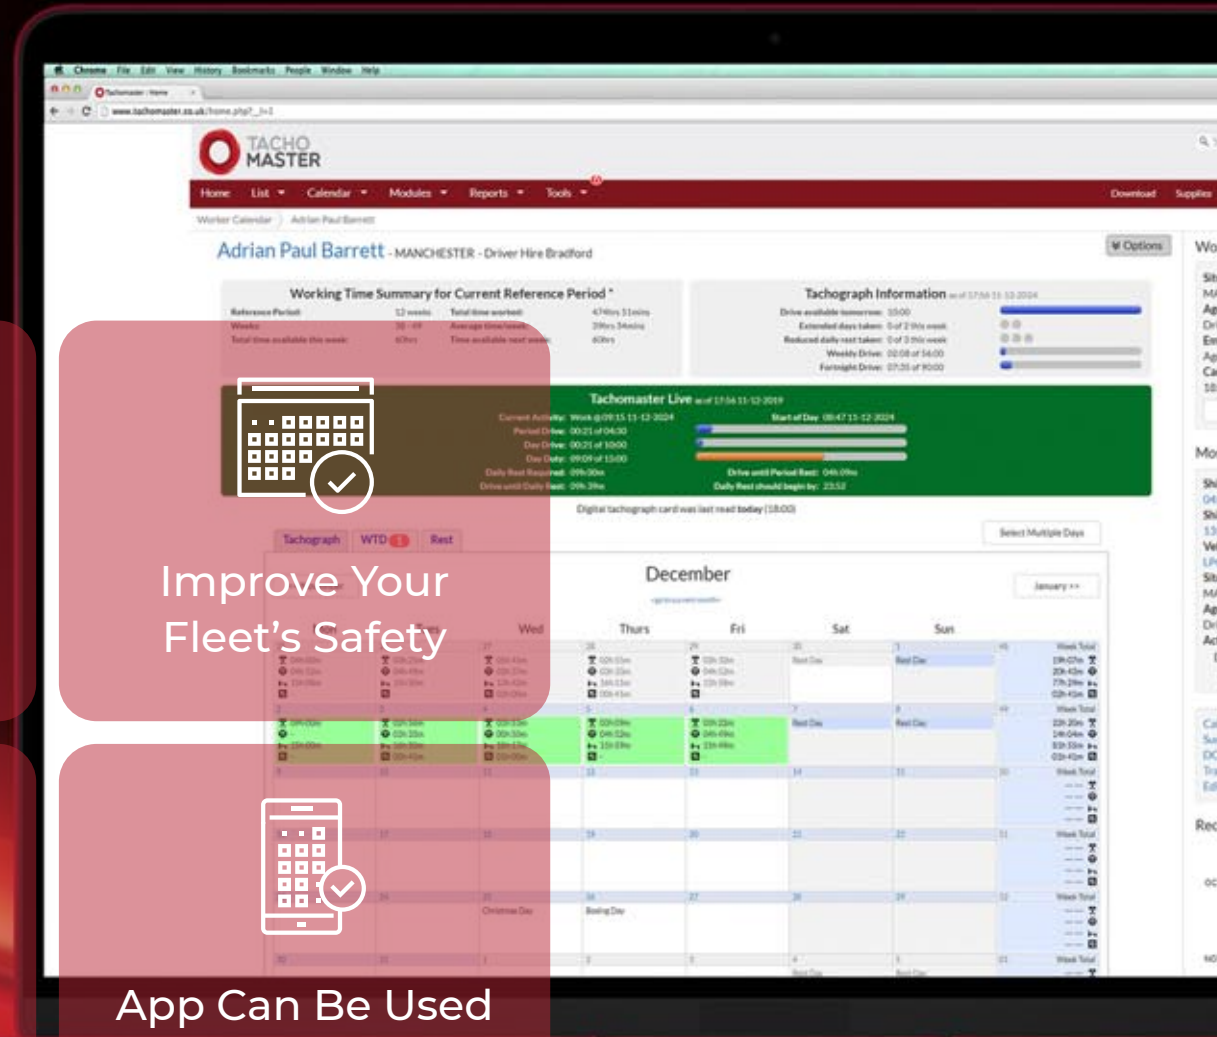

DCRS Improves Driver Behaviour

Drivers Can Track Their Own Hours

App Can Be Used To Affirm Hours

Tachomaster delivers instant analysis and unrivalled management reporting for LGV (HGV), coach and bus operators. Join the undisputed market leaders in tachograph analysis and improve your fleet safety and compliance today.

Utilise existing hardware

Worried you will have to buy new equipment to download your data? Fear not. Tachomaster is set up to use all major brands of card readers, including remote readers and vehicle download tools.

Tachomaster analyses your data instantly

Download driver cards and vehicle units for instant analysis. Once the data is synchronised to the powerful Tachomaster servers, the information is immediately scrutinised for drivers' hours and WTD infringements.

Comprehensive reporting

Tachomaster provides the most comprehensive reporting tools available. You can produce reports in a pdf or spreadsheet format. Also, save time and automatically send your most viewed reports at specific times.

Driver Compliance Reporting System (DCRS)

The DCRS provides an automatic system to monitor and manage your drivers' performance. A driver collects a user-defined number of points per driver infringement. On reaching a certain amount of points, the driver enters a new disciplinary level. The system will display the necessary action to be carried out by the user.

This powerful Tachomaster analytics system highlights your worst drivers and your good drivers. Use DCRS to reduce driver infringement and help improve your driver's compliance, performance and safety more effectively.

CPC and training management

The Tachomaster CPC management system gives you visibility of driver expiry dates for CPC cards and cycle dates. Enter your own course types, not just for CPC but for driver assessment and any other kind of training you wish to record. Produce certificates for all your training types and monitor specific training expiry dates.

Detailed calendars

Tachomaster works hard to put all the data you give it (tachograph driver cards, analogue charts, WTD times, data from web services and other sources) into one place, so you can quickly get the data you need.

The unique driver calendars detail EU driver analysis, WTD on a single tab click, rest calendars and even a calendar to show DOT Tracking telematics scoring.

View all drivers using the advanced group calendar, where various leave events (holidays, etc.) can be added for multiple drivers. Vehicles also have their calendars, which highlight missing data and possible vehicle unit issues.

Smarter proactive compliance powered by Tachomaster AI

Our new Tachomaster AI system comprehensively reviews your driver and vehicle data to highlight potential risks, performance trends, and actions — all from a single, innovative dashboard. This complete approach ensures you're well-informed and secure in your fleet management decisions.

Tachomaster AI transforms how you manage driver and vehicle compliance. It provides a quick, intelligent summary of safety, performance, and potential upcoming risks, so you can act before they occur and stay in control of your fleet.

& Potential Risks

New Driver Compliance Infringement Dashboard

We've developed a new compliance feature to help you review and manage your driver's infringements and highlight any missing mileage breaches.

The NEW Tachomaster, Compliance Infringement Dashboard accurately summarises all your driver infringements and missing mileage violations into one clear and simple interface. The Compliance Dashboard provides a management tool for infringements and to debrief and counsel drivers. Add comments to each infringement and preview, print or send to the *Sign This eDoc App for electronic signatures.

The user-friendly compliance dashboard will streamline the burden of capturing, analysing and organising all your driver infringements. Configure and filter the dashboard interface to find the critical information you require, for example, specific sites, employee types or agency drivers.

Tachomaster is the undisputed market leader because no other tachograph analysis software can offer the same amount of detail, insights and data into your fleet's activities. Tachomaster will help you make your fleet safer and more efficient.

Tachomaster management reports

All reports can be viewed through the Tachomaster website, giving you KPIs on driver and vehicle trends and any compliance issues.

Analytics for drivers and vehicles

Tachomaster offers more reports for driver and vehicle compliance and analytical trends than anyone. With over 85 reports to choose you'll find all the data you need.

Producing driver infringement letters

Tachomaster driver infringement letters provide you with the correct procedures to follow and keep a detailed record of all infringements.

View of your driving and working time

At its core, Tachomaster keeps track of drive, work, availability and rest. The powerful Worker Calendar displays a summary for each day, including rest days and many different leave types.

Get live digital tachograph data

Tachomaster Live gives instant data on your driver's WTD periods and helps you safeguard against driver hours compliance issues.

Agency driver employment days

Tachomaster allows you to highlight an agency driver's working days and ignore the days they have worked for someone else.

Detailed wages report for your workers

Tachomaster can provide a detailed wage report for all permanent, casual or agency workers within your company. Clearer view with the Group Calendar View all your workers on the Group Calendar to see their drive, work, leave and sick data, including infringement issues and completed procedures, all on one screen.

Last card readings for your drivers

See a list of all your driver's last card readings which are grouped into four categories depending on when the previous card reading was taken.

Your vehicle unit's last readings

See a list of all your vehicle unit's last readings, which are grouped into four categories depending on when the previous vehicle reading was taken.

Forensic detail of your vehicle speed

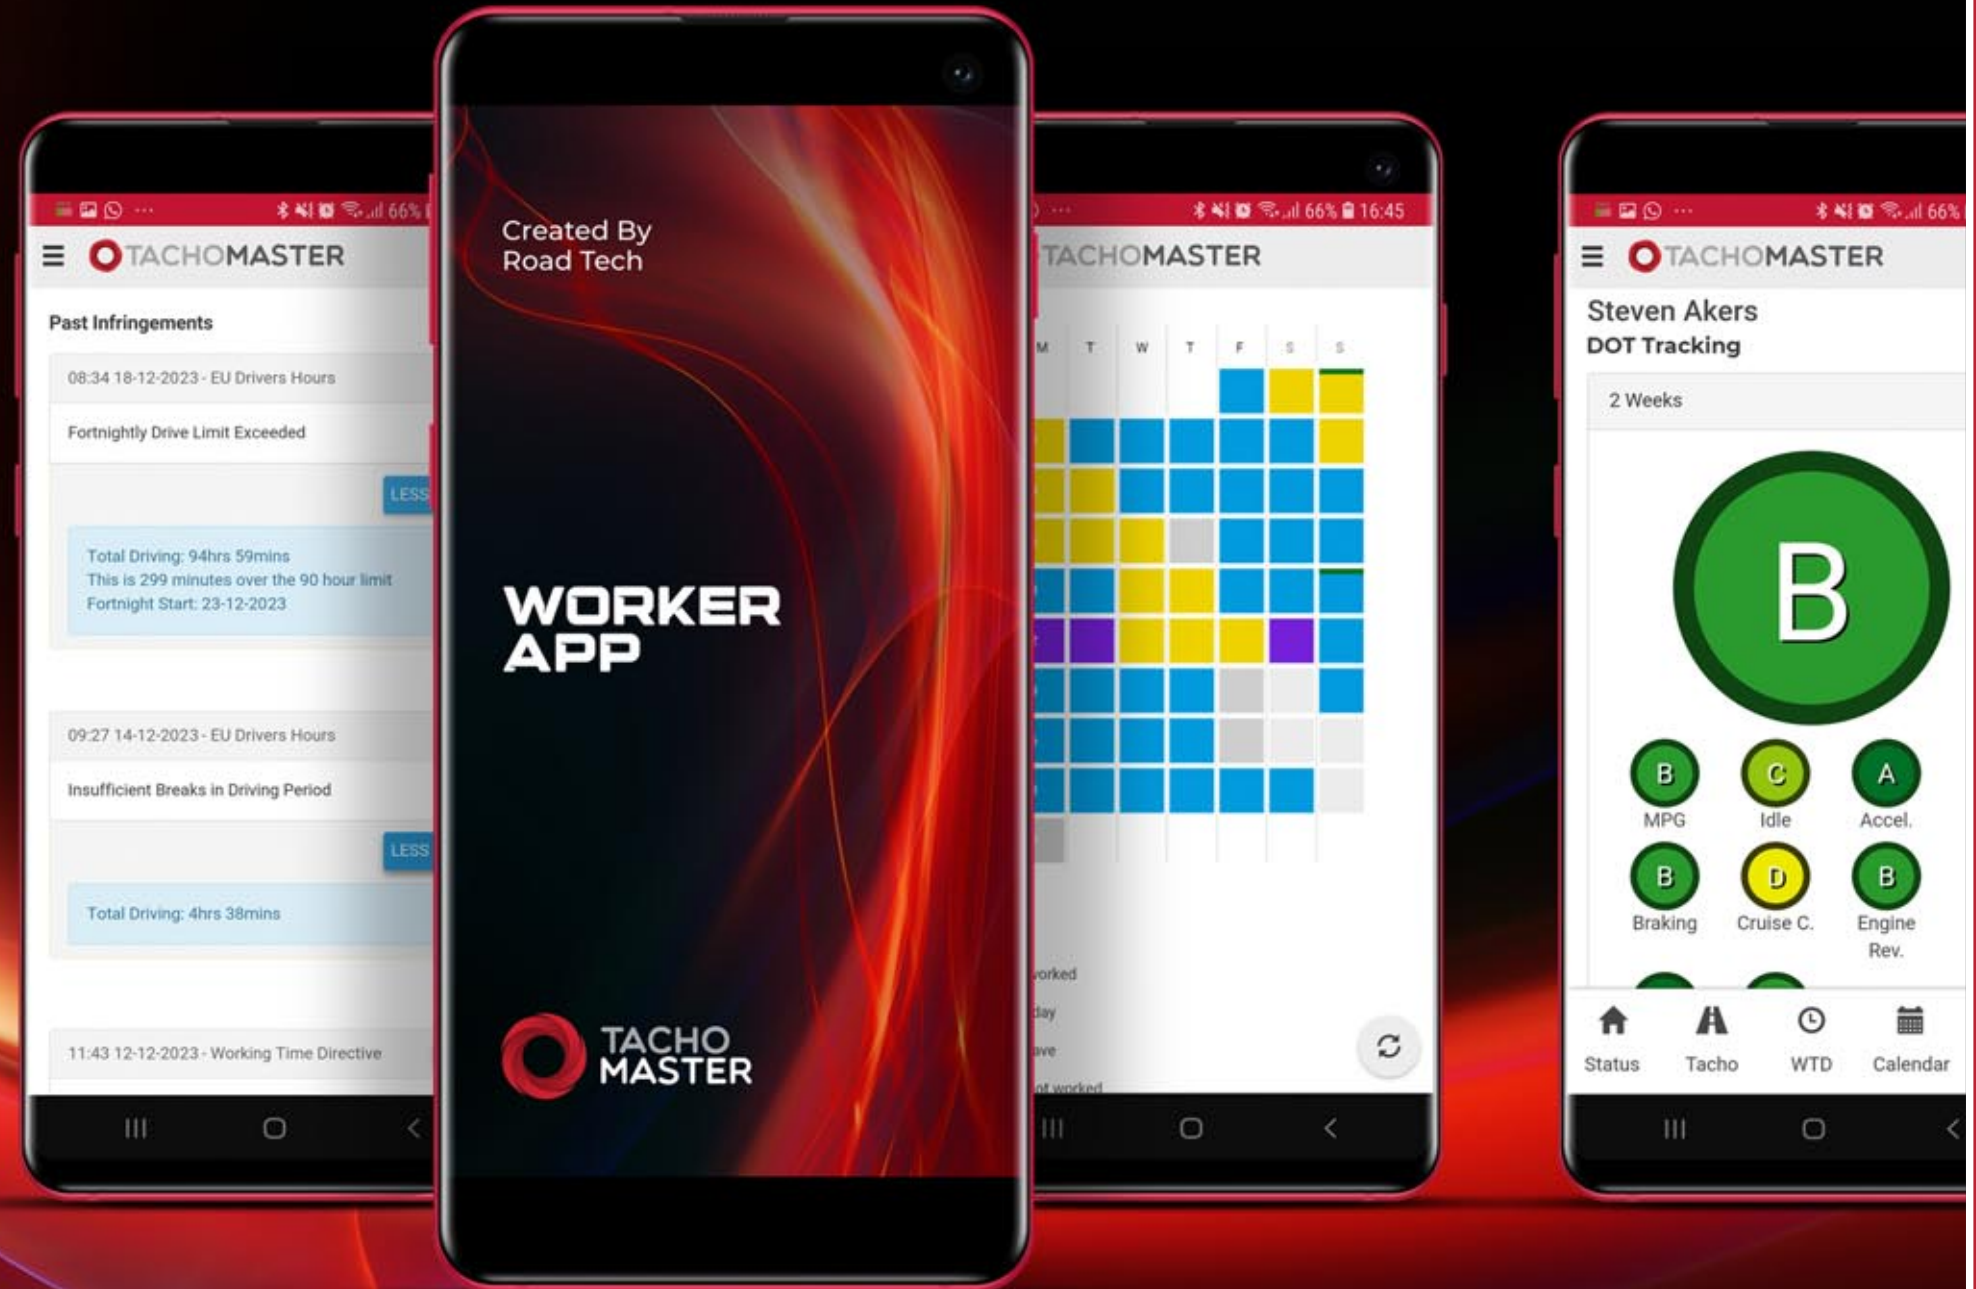

The Vehicle Speed report offers detailed information on vehicle speed and distance. This data highlights poor driving behaviour and shows aggressive braking and acceleration.

Simplify compliance and empower your team

The Tachomaster Worker app revolutionises how your drivers monitor and manage their working days. Using this app, you can empower them to avoid unnecessary infringements and ensure their safety and compliance. Make the smart choice for your team's efficiency and peace of mind!

**WORKER
APP**

**WORKER
APP**

Help drivers keep track of their working and driving hours

The Tachomaster Worker app will help transform how your drivers can track and manage their working week and help prevent unnecessary infringements, keeping them safe and compliant.

The Worker app includes Working Pattern and Shift View Calendars to help your drivers keep track of their working status, rest periods and tachograph compliance regulations. The app provides the driver with a constant visual overview of the recent days, weeks or months of work, including any leave or sick days and highlights any driver infringements. Drivers can see any Driver's Hours or WTD Infringements they have incurred.

The app can affirm your driver's working hours against wages and overtime pay. Drivers can monitor and control their driving through the DOT Tracking Performance Grading.*

**VIRTUAL
TACHO**

New! The Virtual Tachograph app

The Virtual Tachograph app is part of the Tachomaster Worker app. It tracks sub 3.5T vehicles that don't have a tachograph device. The app pairs your mobile via Bluetooth to the DOT Tachograph Download Device. Together, it records driving time, location, and any aggressive driving behaviours and syncs the data into the Tachomaster and DOT Tracking dashboards, giving you complete visibility of your driver's driving activity.

**VIRTUAL
TACHO**

Gain full visibility via the Virtual Tachograph app

Now included in the Tachomaster Worker app, the Virtual Tachograph app enables your business to monitor and log driver activity in company vehicles weighing under 3.5 tonnes, such as vans without digital tachograph units.*

Paired via bluetooth with the DOT Tacho Download Device, the app captures essential driving data — including time behind the wheel, location, geofence activity, and poor driving behaviours like harsh braking or acceleration. This ensures your business stays compliant and informed across your entire fleet, not just HGVs.

All driving and work data from the Virtual Tachograph app is integrated directly into your Tachomaster dashboards. You can track what drivers were doing on days they used sub-3.5T vehicles — ensuring complete coverage of your workforce and activity data, even when no physical tachograph is present.

Paperless driver infringement letters

We've developed a new electronic e-signature software solution to digitally manage and capture your driver compliance (DCRS) paperwork and infringement letters. Debrief your drivers face to face and have them sign their infringement letter on an Android or IOS tablet or smartphone. A safe, quick, and more efficient way of performing your compliance duties.

The flexible Sign This eDoc app system is a safe, secure, paperless electronic e-signature software solution. Seamlessly integrated it into your business and swiftly adapted it to suit your specific requirements. In fact, it's the easiest way to streamline and digitise all your essential paperwork, documents and signatures. All documents are independently time-stamped, so you know that a signature was captured tamper-free.

Save time and hassle and bring the power and simplicity of electronic e-signature into your business today.

Tachomaster offers the industry's most comprehensive set of ready-made reports, providing detailed insights into your drivers and vehicle activities. Improve compliance and safety and reduce driver infringements more effectively with Tachomaster.

Immediate data processing

We pride ourselves on fast and reliable tachograph analysis. Our high-performance server cluster works as soon as you upload your driver or vehicle data via the Tachomaster client or the online card reader.

There is no waiting around for reports in the post or by email (unless you set up a scheduled report!). As soon as the data has been processed, you can run reports online immediately.

Client software

The free Tachomaster client software provides the tools for uploading your tachograph driver's cards, vehicle units and analogue charts.

You can start uploading data immediately to view in Tachomaster. You can use various tools and readers to collect your data, whatever is easiest for you. Using the Tachomaster client, you can upload the data for analysis.

Custom user profiles

The ability to create unlimited users would be complicated to manage without a way to customise what a user can do. Tachomaster has created custom user profiles to overcome this issue.

You can create as many custom user profiles as you need, each one with its unique set of permissions giving any users with that profile access to features in Tachomaster, from running reports, downloading raw data or administering users and profiles themselves. You can create read-only profiles, too, perfect for restricting specific users.

Assign missing card data

When a vehicle has been used without a driver card present other systems will leave a gap in the driver data. Tachomaster allows you to assign the data from the vehicle to the appropriate driver, filling in the annoying gap to help explain any unknown or missing mileage.

Just upload the Tachograph vehicle unit, and Tachomaster's tachograph analysis will identify any periods where a driver card was missing. You can click and assign it to complete the driver data.

Increase fleet safety with our unique modules

Our unique modules make Tachomaster the most
complete tachograph software on the market.

CREATED BY ROAD TECH

Modules to improve training, compliance and safety

Our advanced compliance modules help you retrain drivers, manage training, improve safety, and meet DVSA Earned Recognition digital standards.

DCRS 3 Module

Achieve superior compliance by pinpointing offences and creating clear, actionable driver development. Monitor performance, identify risk, and reinforce safety using real-time scoring to protect fleet compliance.

Earned Recognition Module*

Effortlessly control your tacho compliance with advanced monitoring and reporting tools. Identify driver infringements, manage KPIs, and meet DVSA Earned Recognition standards easily from our powerful platform.

Driver Profiler Module*

Track your drivers' safety, performance and compliance from live data to boost fleet safety. High scores highlight risks, enabling you to take immediate action and retrain drivers to improve your transport operations.

Training Plus Module*

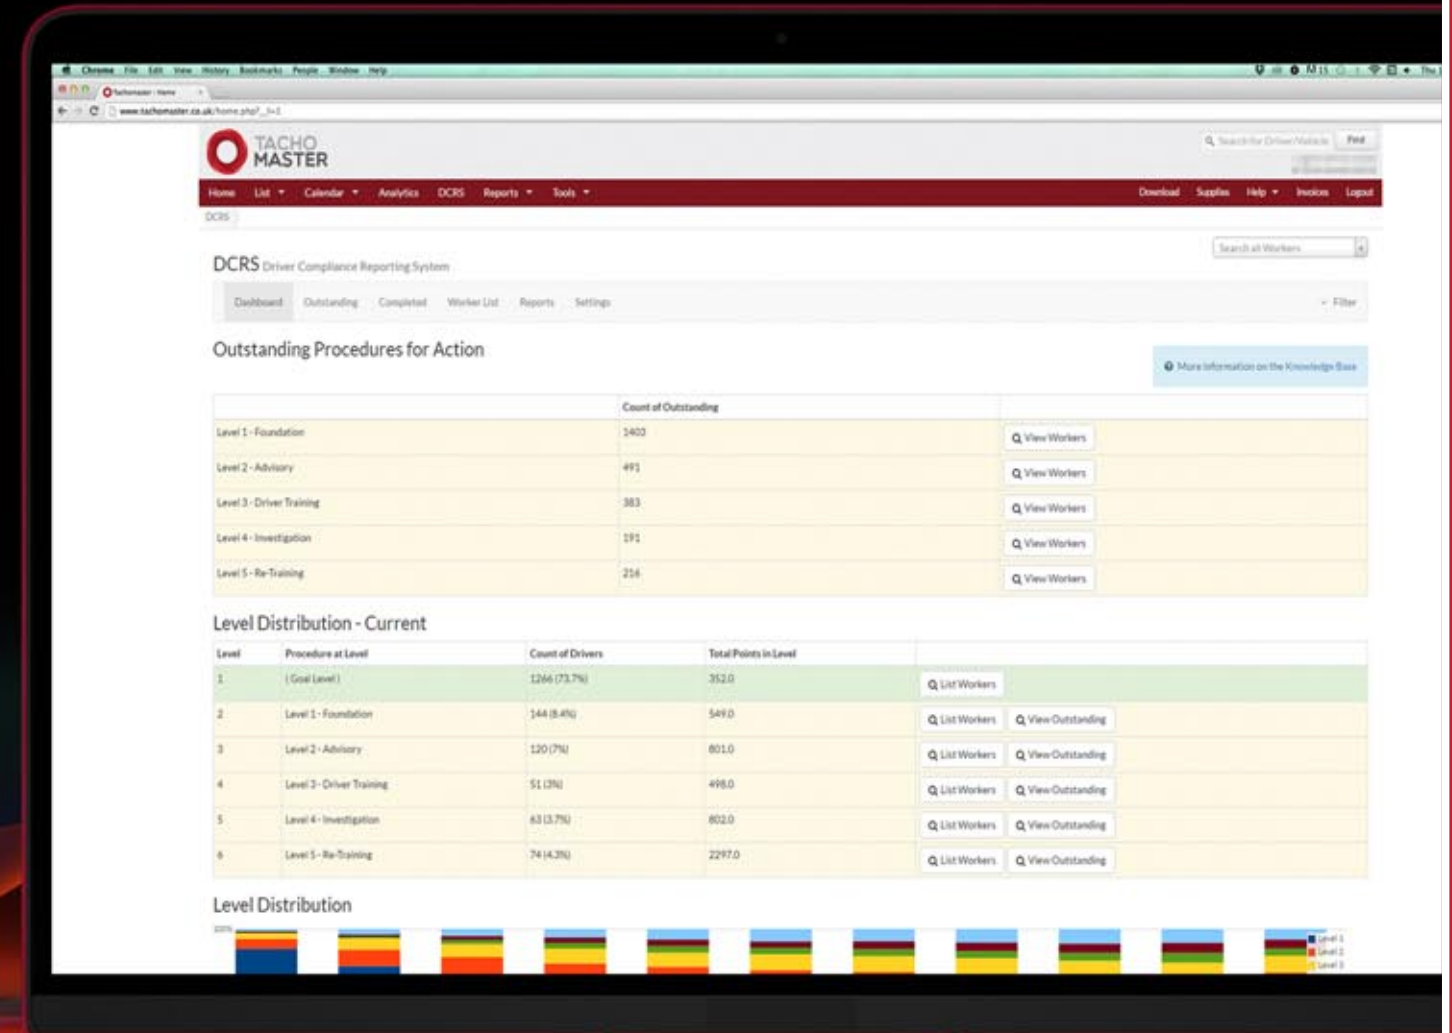

Simplify staff training across all roles — no spreadsheets required. Track CPC, inductions, assessments, and site-specific sessions. Upload documents, assign retraining, and stay fully compliant from one central hub.

DCRS - Driver Compliance Reporting System

Improve disciplinary processes and reduce unnecessary driver infringements and compliance issues

Monitor your driver's performance, safety and compliance with the Tachomaster DCRS system. The DCRS system tracks and identifies non-compliant drivers and provides a new way to manage, discipline and improve your drivers' behaviour and compliance issues.

*Using a score-based system, DCRS will detect and record any driver infringements and issue a certain number of points per violation. Drivers who accumulate a certain level of points will enter a new disciplinary level and activate a DCRS performance procedure. The system will highlight the necessary actions to be taken, helping you to improve your fleet safety, compliance and efficiency.

New features for DCRS

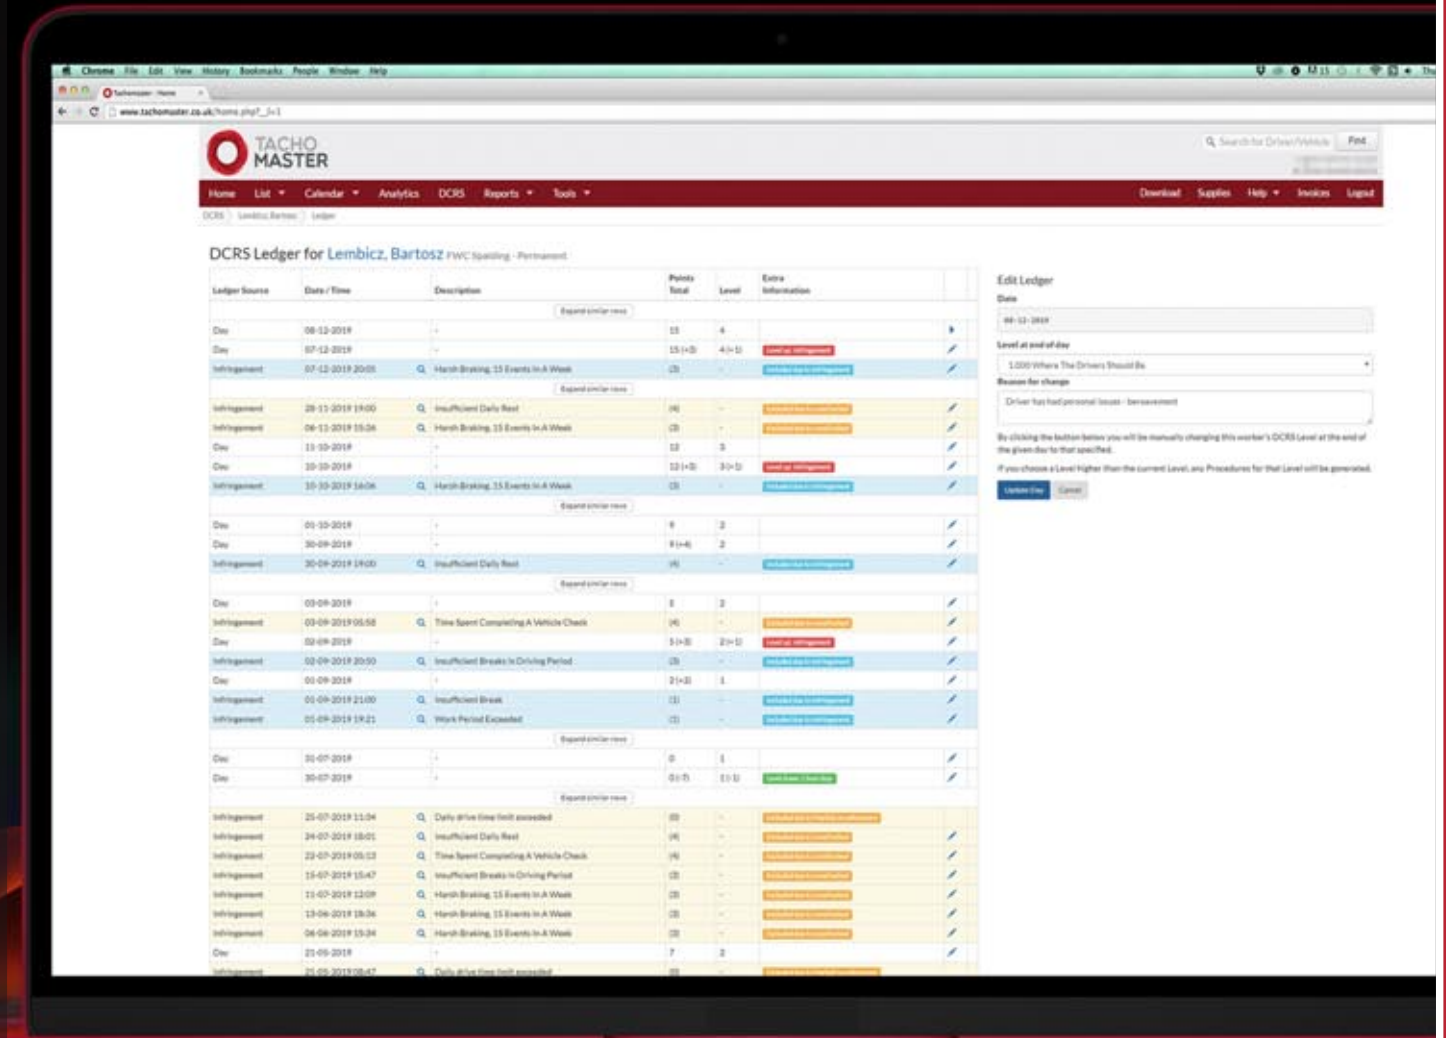

We continually improve Tachomaster and have worked alongside our customers to develop a better version of DCRS. The new version is more flexible in handling driver compliance issues.

Set up adjustable procedures to help retrain your drivers in compliance with safety standards. Centralise driver compliance issues and streamline, organise and mitigate risk across your fleet.

New Features

- More flexibility on how you handle driver compliance issues
- Disciplinary points levels can be altered quickly and easily
- Monitor compliance issues in days, weeks or months
- Add more disciplinary points for specific and severe incidents
- Add more information details for retraining procedures
- Use DCRS to highlight misconduct and gross misconduct
- Disciplinary points can be locked until training has been completed
- Use DCRS to put clear procedures in place for compliance issues
- All disciplinary profiles and procedures can be viewed instantly
- The DCRS dashboard gives you an overview of all compliance issues
- Nullify DCRS points if the driver has personal issues or a mistake
- Send procedure letters via our new Sign This eDoc app system

Enhance fleet safety via DVSA Earned Recognition

Prove compliance, reduce roadside checks, and simplify reporting all from one powerful system.

Showcase your compliance with DVSA Earned Recognition

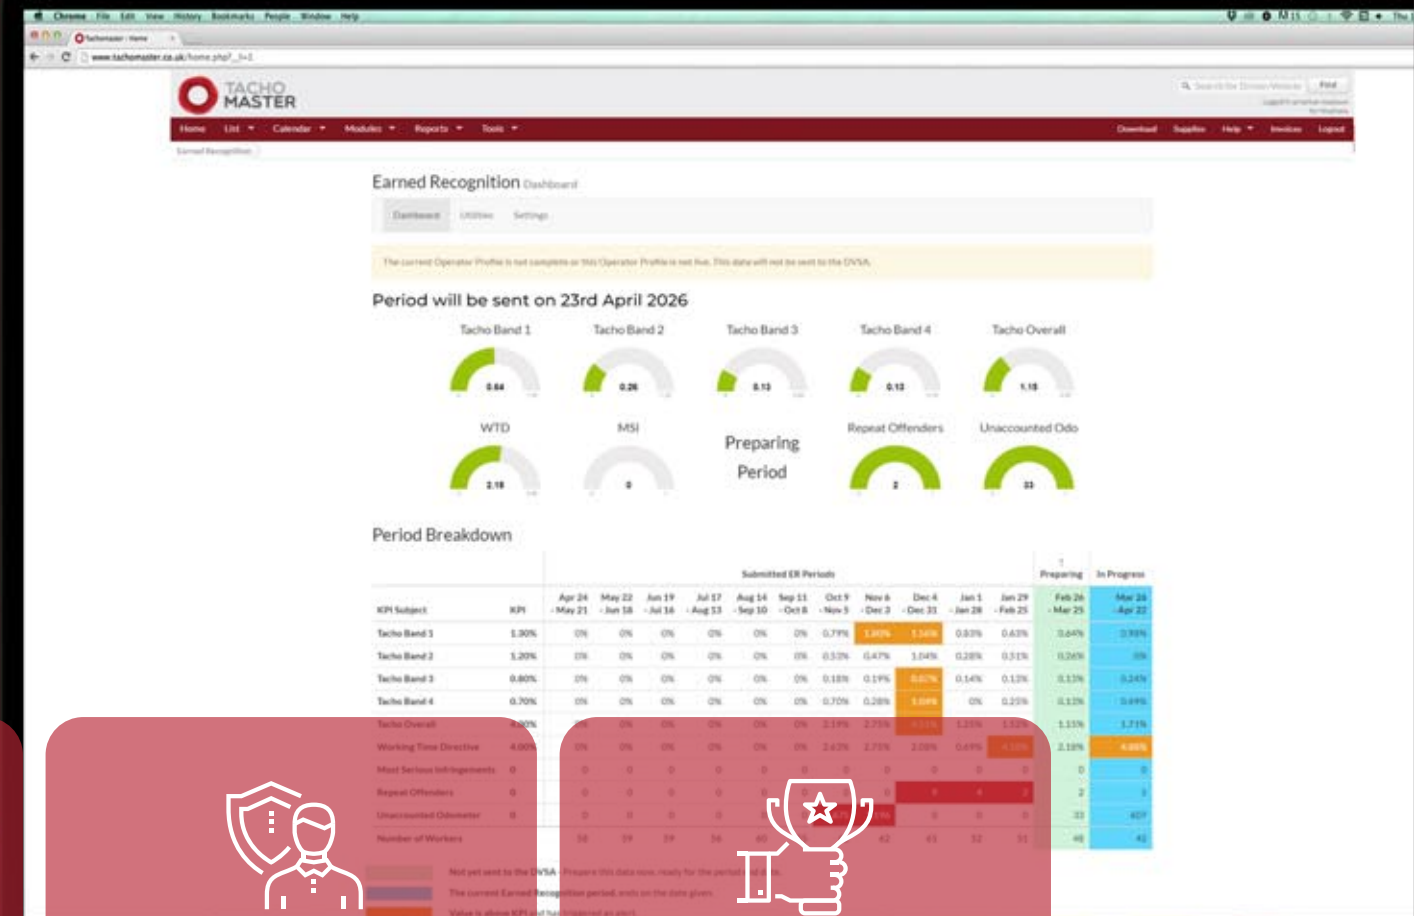

This voluntary DVSA scheme lets HGV, bus, and coach operators demonstrate strong safety records and compliance systems — giving you more control over your operations.

Reduce roadside checks and focus on your operations

Earned Recognition helps cut admin costs and unnecessary DVSA inspections. With enforcement targeting non-compliant operators, your compliant fleet can stay focused on performance and safety.

Reduce risks and track driver's safety and compliance records

Driver Profiler is a powerful module built to help transport operators reduce risk factors and improve fleet and driver performance, compliance, and safety.

Dispatching vehicles and drivers every day carries significant responsibility. Driver Profiler removes the pressure by automatically analysing complex compliance data and delivering clear, accurate performance scores for each driver — all in one place.

Quickly detect potential issues and target the areas that need attention, whether it's unsafe driving, repeat infringements, missed training, or site-level oversight. With Driver Profiler, you stay in control of performance, compliance, and safety — without the guesswork.

Our commitment to your security

At Road Tech, we prioritise security and excellence in everything we do. Our **ISO 27001:2022** certification is not just a credential; it demonstrates our relentless dedication to protecting your information and providing solutions that you can trust. Partner with us for resilient outcomes that ensure your peace of mind.

ISO 27001 Certification:

At Road Tech, security has always been a core priority. Our ISO 27001:2022 certification reflects our unwavering dedication to safeguarding information and delivering secure, resilient, and trustworthy solutions to our clients.

We hold ISO 27001 certification across all our software products: Tachomaster, DOT Tracking, Roadrunner, Checkmaster, and PreDrive. This internationally recognised certification demonstrates our robust Information Security Management System (ISMS) and reinforces our commitment to maintaining the highest standards of confidentiality, integrity, and availability of client data.

What is ISO 27001?

ISO 27001 is the international standard for Information Security Management Systems (ISMS) standard. It provides a comprehensive and systematic framework for managing sensitive company and customer information, ensuring it remains secure and protected against cyber threats, data breaches, and unauthorised access. By adhering to the rigorous requirements of ISO 27001, organisations demonstrate their commitment to safeguarding information, mitigating risks, and fostering trust with their clients and partners.

The Journey to ISO 27001

Achieving ISO 27001 certification is no small feat. The process requires a deep and comprehensive evaluation of an organisation's policies, processes, and controls to ensure they align with the standard's requirements.

At Road Tech, we always take a proactive and structured approach to all challenges, included ISO 27001:

Assessing Current Practices: We began by thoroughly auditing our existing information security practices. This helped us identify strengths, pinpoint improvement areas, and define a clear roadmap toward compliance.

Developing Robust Policies: We established and refined our information security policies, which are designed to protect sensitive data, manage risks, and ensure compliance with regulatory requirements. These policies address areas such as access controls and encryption, incident response, and employee awareness.

Employee Engagement and Training: Information security is a shared responsibility; our team has been at the heart of this journey. We conducted comprehensive training sessions to raise awareness about the importance of information security and ensure all employees understood their roles in maintaining it.

Implementing New Technologies: To enhance our security posture, we invested in cutting-edge technologies and tools that align with ISO 27001 standards. These solutions enable us to monitor, detect, and respond to potential threats efficiently.

Continuous Improvement: Achieving ISO 27001 certification is not a one-time effort. We have established robust internal audit processes, management reviews, and continual improvement cycles to ensure our ISMS evolves with the changing threat landscape. This commitment to continuous improvement should reassure our clients and partners of our dedication to their security.

The Benefits for Our Clients

Achieving ISO 27001 certification isn't just an internal accomplishment; it's a commitment to our clients and their peace of mind. Here are some of the ways this Certification has made a difference for our clients:

Enhanced Data Security: Clients can trust that their information is handled within a framework that meets internationally recognised information security standards.

Proactive Risk Management: By continuously identifying, assessing, and treating risks, we reduce the likelihood of security incidents and service disruptions.

Regulatory and Contractual Compliance: ISO 27001 supports alignment with legal, regulatory, and contractual obligations, reducing compliance-related risks.

Increased Trust and Transparency: ISO 27001 certification demonstrates our dedication to transparency and accountability, strengthening our clients' trust.

Competitive Advantage: Partnering with an ISO 27001 certified organisation demonstrates a shared commitment to operational excellence and security, giving our clients a clear edge in the marketplace.

Looking Ahead

We remain focused on building a culture of security and continuous improvement. ISO 27001 certification is not the end of the road but a foundation for future growth and innovation. We're committed to maintaining the highest standards and delivering secure, dependable solutions that empower our clients to succeed.

We extend our heartfelt gratitude to every member of the Road Tech team for their dedication and hard work in setting the highest benchmarks for excellence and security in our industry.

The future of fleet management
